

## ABBREVIATION

|       |                                                                      |
|-------|----------------------------------------------------------------------|
| AAI   | Airport Authority of India                                           |
| ACWCs | Area Cyclone Warning Centres                                         |
| AERB  | Atomic Energy Regulatory Board                                       |
| BARC  | Bhabha Atomic Research Centre                                        |
| BIS   | Bureau of Indian Standard                                            |
| BISAG | Bhaskar Acharya Institute for Space Applications and Geo-Informatics |
| BOOT  | Build Own Operate and Transfer                                       |
| BPL   | Below Poverty Line                                                   |
| CBOs  | Community Based Organizations                                        |
| CBRN  | Chemical, Biological, Radiological and Nuclear                       |
| CCG   | Central Crisis Management Group                                      |
| CDMA  | Code Division Multiple Access                                        |
| CDO   | Central Design Organization                                          |
| CEO   | Chief Executive Officer                                              |
| CFO   | Chief Fire Officer                                                   |
| CMG   | Crisis Management Group                                              |
| CoH   | Commissioner of Health                                               |
| COR   | Commissioner of Relief                                               |
| CP    | Commissioner of Police                                               |
| CWC   | Central Water Commission                                             |
| CWCs  | Cyclone Warning Centers                                              |
| CWDS  | Cyclone Warning Dissemination System                                 |
| DAE   | Department of Atomic Energy                                          |
| DCG   | District Crisis Management Group                                     |
| DDO   | District Development Officer                                         |
| DEOCs | District Emergency Operation Centres                                 |
| DG    | Director General                                                     |
| DGHS  | Directorate General of the Health Services                           |
| DGP   | Director General of Police                                           |
| DIG   | Deputy Inspector General                                             |
| DSO   | District Supply Officer                                              |
| DSP   | District Superintendent of Police                                    |
| DISH  | Director Industrial Safety & Health                                  |
| DM    | Disaster Management                                                  |
| DoR   | Director of Relief                                                   |
| DP&S  | Directorate of Purchase and Stores                                   |
| DPR   | Detailed Project Report                                              |
| DRM   | Disaster Risk Management                                             |
| DRMP  | Disaster Risk Management Programme                                   |
| EFC   | Expenditure Finance Committee                                        |
| EMS   | Emergency Medical Services                                           |
| EOC   | Emergency Operation Centre                                           |
| ERCs  | Emergency Response Centres                                           |
| ERTs  | Emergency Response Teams                                             |

|           |                                                       |
|-----------|-------------------------------------------------------|
| ERU       | Emergency Response Unit                               |
| F&ES      | Fire and Emergency Services                           |
| GAD       | General Administration Department                     |

# **CHAPTER 1**

## **INTRODUCTION**

## **1.1 Aims and Objectives of the Disaster Management Plan**

Vadodara District is prone to multiple hazards such as Floods, Cyclone, Heavy Rain, Lightening, Earthquake and Fires and have experienced & witnessed too on several occasions in the past. Vadodara district has experienced the effects of cyclone in the year 1998, effects of devastating earthquake of year 2001 & faced the impact of major floods once in every three-year period. In the past, the district was severely affected by the floods of 1978, 1994, 2005, 2006, 2013, 2014, 2019, 2023, 2024, 2025 and 2026. Moreover, the district comes under the golden corridor and has several chemical industries / industrial areas in the district hence there is a need to have such disaster management plan which may be useful to comply with multi hazard approach to deal with different disasters.

Recognizing the fact that most tasks and actions before and following a disaster are common at the district level, the Vadodara district administration has used a multi-disaster approach (all disasters covered by one plan) while developing disaster management plan for the district. The present plan is not intended to provide comprehensive explanations and background information about a disaster or serve as a training manual on how to respond to a disaster or conduct a disaster related task. This is simply a Multi Hazard Management Plan consisting of details regarding different hazards that affect the district along with the response structure to deal with such hazards and having linkages of subsidiary DM plans of all levels and of sectors with this Plan.

### **Following are the main objectives of this Plan:**

- To protect and minimize the loss of human lives from the effects of different disasters
- To promote a culture of prevention and preparedness by ensuring that disaster management receives the highest priority at all levels
- To ensure that community is the most important stakeholder in the disaster management process
- To minimize the sufferings of the people arising due to different disasters
- To mainstream the disaster management concerns into the developmental planning process
- To minimize the damage and losses that occur to the Property and Infrastructure due to different disasters

- To reduce the vulnerability aspect of both the people and infrastructure due to different disasters
- To ensure efficient response and relief with a caring approach towards the needs of the vulnerable sections of society.
- To create awareness and preparedness by providing advice and training to the agencies involved in disaster management and to the community
- To assess the risks and vulnerabilities associated with various disasters
- To provide clarity on roles and responsibilities for all the stakeholders concerned with disaster management so that disasters can be managed more effectively and efficiently
- To strengthen the capacities of the community and to establish and maintain effective Disasters Response Systems / Mechanisms
- To strengthen the existing Response mechanism
- To incorporate all the aspects concerned of DM for pre, during and post disaster phenomena
- To integrate and link up all level specific and department specific Disaster Management Plans

## **1.2 Authority for the DDMP : DM Act 2005**

Preparation of Disaster Management Plan is one of the mandatory provisions under the Gujarat State Disaster Management Act-2003 and the National Disaster Management Act-2005. With respect to the above-mentioned provisions, Gujarat State Disaster Management Authority and Relief Commissioner have issued guidelines for the preparation of District Disaster Management Plan.

- i. As per THE GUJARAT STATE DISASTER MANAGEMENT ACT, 2003 under CLAUSE 26. Sub section (1), (2), (3), (4) & (5) Of CHAPTER X - FUNCTIONS OF LOCAL AUTHORITIES, Each department of the Government in a district shall prepare a disaster management plan for the district and the Collector shall ensure that such plans are integrated into the Disaster Management Plan for the whole of the district and submit a copy of the District Disaster Management Plan, and of any amendment thereto the Authority and the Commissioner.
- ii. Under the provision of the DISASTER MANAGEMENT ACT, 2005, under Clause 30 Section (2), subsection (i) & Clause 31 Section (1) of CHAPTER IV District Disaster Management Authority, without prejudice to the generality of the provisions of sub section(1), the district

authority may (i) prepare a Disaster Management Plan including District Response Plan for the district, and there shall be a Disaster Management Plan for every district of the state.

The Disaster Management Plan prepared, reviewed and updated according to the above provisions and when there are any significant changes in that then it will have to be incorporated by the District Collector / District Emergency Operation Centre.

The DM Act authorizes the District Collector to secure cooperation and assistance from other parties in efforts to avoid or reduce the impact of disasters. The Collector (Specifically) and Government authorities (generally) are responsible for managing hazards and disasters which affect a district, with support from GSDMA, the relief commissioner and other public and private parties as may be needed. The roles, responsibilities and obligations of the Collector and other parties are set out in detail in the Act and are considered as part of this plan.

### **1.3 Evolution of the Plan in brief:**

The Vadodara District Disaster Management Plan 2026–2027 has been developed through a systematic and structured process in alignment with national and state disaster management guidelines. The plan builds upon the review of previous district plans, incorporating lessons learned from past disasters and improving existing strategies and frameworks.

During the preparation of the plan, a comprehensive risk and vulnerability assessment of the district was carried out, considering hazards such as floods, heatwaves, fires, industrial accidents, and other potential risks specific to Vadodara. Inputs and data were collected through consultations with key stakeholders, including district authorities, municipal bodies, health departments, police, fire services, NGOs, and other line departments.

The plan follows the four key phases of disaster management—Mitigation, Preparedness, Response, and Recovery—ensuring a holistic approach to disaster risk reduction and management. It also emphasizes inter-departmental coordination, resource mapping, capacity building, and strengthening of early warning and communication systems.

Efforts have been made to incorporate best practices, conduct training programs, and include mock drills to enhance preparedness and response efficiency

### Evolution, Procedure and Methodology to be Followed for Plan Preparation:

The preparation of the Disaster Management Plan is a continuous and dynamic process that evolves with changing risk scenarios, emerging challenges, and lessons learned from past experiences. The plan is periodically reviewed and updated to incorporate new policies, guidelines, technologies, and field-level inputs, ensuring its relevance and effectiveness.

**Procedure for Plan Preparation** The procedure adopted for preparing the plan involves a systematic and participatory approach. It begins with the collection of baseline data related to the district's geography, demography, infrastructure, and hazard profile. This is followed by risk and vulnerability assessment to identify potential threats and their impact on communities and critical assets.

Subsequently, consultations and meetings are conducted with all key stakeholders, including government departments, local authorities, emergency services, NGOs, and community representatives. Roles and responsibilities of each department are clearly defined to ensure coordinated action during disasters. Resource mapping is carried out to identify available manpower, equipment, and facilities.

**Methodology for Plan Preparation:** The methodology focuses on a multi-hazard approach, integrating prevention, mitigation, preparedness, response, and recovery aspects. Both qualitative and quantitative methods are used for risk assessment, including historical data analysis, hazard mapping, and field inputs.

The plan also incorporates capacity building measures such as training programs, awareness campaigns, and mock drills. Emphasis is given to strengthening early warning systems, communication mechanisms, and emergency response frameworks.

Regular review and updating mechanisms are built into the plan to ensure it remains practical, actionable, and aligned with state and national guidelines

## **1.4 Stakeholders and their responsibilities**

### **1. District Administration (District Collector / District Magistrate):**

Acts as the overall Incident Commander.

Coordinates all disaster management activities.

Ensures implementation of the District Disaster Management Plan.

Mobilizes resources and issues necessary directions to departments.

### **2. District Disaster Management Authority (DDMA):**

Formulates and updates the district disaster management plan.

Ensures coordination among all line departments.

Monitors preparedness and response activities.

### **3. Police Department:**

Maintains law and order during disasters.

Assists in evacuation and crowd control.

Provides security to affected areas and relief materials.

### **4. Fire and Emergency Services:**

Conducts search and rescue operations.

Handles fire-related incidents and hazardous situations.

Assists in evacuation and emergency response.

### **5. Health Department:**

Provides medical care and emergency health services.

Manages hospitals, ambulances, and medical teams.

Prevents outbreaks of diseases in affected areas.

### **6. Municipal Corporation / Local Authorities:**

Ensures water supply, sanitation, and waste management.

Clears debris and restores basic services.

Manages shelters and relief camps.

#### **7. Public Works Department (PWD):**

Restores roads, bridges, and public infrastructure.

Provides technical support for temporary shelters.

#### **8. Electricity Department:**

Restores power supply.

Ensures safety of electrical installations.

#### **9. NGOs and Voluntary Organizations:**

Provide relief materials like food, water, and clothing.

Support rescue, rehabilitation, and awareness activities.

#### **10. Community and Local Volunteers:**

Act as first responders.

Assist in evacuation and local coordination.

Support relief distribution and awareness.

#### **11. Media:**

Disseminates accurate and timely information.

Spreads awareness and government advisories.

#### **12. Private Sector / Industries:**

Provides resources, logistics, and technical support.

Ensures safety of industrial operations and workers.

### **1.5 How to use the plan**

The Disaster Management Plan is a practical operational document designed to guide all stakeholders before, during, and after a disaster. It should be used in a structured and coordinated manner to ensure effective disaster risk reduction and response.

### **1. Before Disaster (Preparedness Phase):**

Use the plan to identify roles and responsibilities of each department and stakeholder.

Follow preparedness actions such as training, mock drills, and capacity building.

Refer to hazard maps, risk assessments, and resource inventories for planning.

Strengthen early warning systems and communication protocols.

### **2. During Disaster (Response Phase):**

Use the plan to activate the Incident Response System (IRS) and command structure.

Refer to Standard Operating Procedures (SOPs) for quick and coordinated action.

Deploy resources such as rescue teams, medical support, and evacuation plans as defined in the plan.

Ensure real-time coordination between control rooms, field teams, and district authorities.

### **3. After Disaster (Recovery Phase):**

Use the plan to guide rehabilitation and reconstruction activities.

Conduct damage and needs assessment as per prescribed formats.

Restore essential services like water, electricity, health, and infrastructure.

Implement long-term risk reduction and mitigation measures.

### **4. For Training and Awareness:**

Use the plan as a reference for training government staff, NGOs, and community volunteers.

Conduct awareness programs based on identified risks and safety measures.

### **5. For Coordination and Decision-Making:**

Use the plan as a reference document for inter-departmental coordination.

Support evidence-based decision-making during emergencies.

## **1.6 Approval Mechanism of the Plan: Authority for implementation (State level/District level orders)**

The plan would be put into action as per the levels of disasters categorized i.e. L0, L1, L2 & L3.

### **Levels of Disaster (The L Concept)**

The L concept has been developed to define the different levels of disaster to facilitate assistance to State and the Centre. It has four levels which are as follows.

- **L0 level:** Denotes normal times, which will be utilized for close monitoring, documentation and preparatory activities. Training in Search and Rescue teams, rehearsals, evaluation and inventory updating for response activities will be carried out during this period.

- **L1 level:** Denotes when the disasters which can be managed at the district level where the State and the Centre need to be on guard in case assistance is required for disaster relief operations.
- **L2 level:** Disaster situations that require assistance and active participation of State resources for management of the disaster.
- **L3 level :** Disaster situation arises in case of large-scale disasters that have a noticeable impact on a few districts of states and when the State and District authorities have been overwhelmed with the disaster and require assistance from the Centre for rescue and relief operation

### **1.7 Plan review and updation: Periodicity**

- The DDMP is reviewed and updated regularly to ensure that it remains effective, relevant, and aligned with the changing risk environment and operational needs of the district.
- Changing Risk and Hazard Scenarios: New or increasing hazards such as extreme weather events, heatwaves, floods, or industrial risks require updates in planning and response strategies.
- 2. Lessons Learned from Past Disasters: Experiences from actual disaster events and emergency responses highlight gaps and help improve procedures, coordination, and preparedness.
- Updating Government Policies and Guidelines: National and state disaster management authorities periodically revise guidelines, SOPs, and frameworks, which must be incorporated into the DDMP.
- Technological Advancements: Improved early warning systems, communication tools, GIS mapping, and response technologies need to be integrated into the plan.
- Changes in Infrastructure and Demography: Population growth, urban expansion, and new infrastructure development change vulnerability patterns and resource requirements.
- Capacity Building and Resource Updates: Availability of new equipment, trained personnel, and updated resource inventories must be reflected in the plan.
- Improving Coordination Mechanisms: Periodic review helps strengthen inter-departmental coordination and clarify roles and responsibilities.
- Ensuring Operational Effectiveness: Regular updating ensures that the plan remains practical, actionable, and ready for real-time implementation during emergencies.

## **CHAPTER 2**

# **HAZARD, VULNERABILITY, CAPACITY AND RISK ANALYSIS**

### **2.1.1 Socio – economic profile of the Vadodara district.**

#### **1. Geographical & Administrative Profile**

- Located in central Gujarat with district headquarters at Vadodara
- Area: ~7,546 sq. km
- Administrative divisions:
- 12 talukas
- ~694 villages
- Urban local bodies: 1 Municipal Corporation + municipalities

#### **2. Demographic Profile**

- Population
- Census 2011: 41.65 lakh
- Estimated (2026): ~51 lakh
- Growth rate (2001–2011): ~14.16%
- Urban–Rural Composition
- Urban: ~49–64%
- Rural: ~36–50%
- Sex Ratio
- 934 females per 1000 males
- Age Structure
- Children (0–6 years): ~12% of population

#### **3. Social Composition**

- Caste Structure
- Scheduled Castes (SC): ~5–6%
- Scheduled Tribes (ST): ~27.6% (significant tribal population)
- Religion
- Hindus: ~86–89%
- Muslims: ~9–11%
- Others (Jains, Christians, etc.): small proportions
- Languages
- Gujarati: ~82% (dominant)
- Hindi, Marathi, Sindhi also spoken

- 4. Education & Literacy
- Overall literacy: ~78–79%
- Male literacy: ~85%
- Female literacy: ~72%
- Urban literacy: ~89%
- Rural literacy: ~68%
- Strong urban educational base
- Noticeable gender and rural–urban gaps
- Recent surveys suggest literacy improving significantly (above 90% in newer estimates)

### **5. Economic Profile**

- Industrial Structure
- Vadodara is one of Gujarat's major industrial hubs with industries like:
- Fertilizers
- Petrochemicals & chemicals
- Pharmaceuticals
- Engineering & machine tools
- Biotechnology
- Textiles

#### **📌 Special feature:**

- ~35% of India's power equipment manufacturing units are located here
- Agriculture
- Important crops:
- Tobacco, groundnut, wheat, jowar
- Sugarcane, pulses, oilseeds
- Fruits and floriculture

#### **📌 Agriculture remains crucial, especially in tribal and rural areas.**

- Service Sector
- Growing role of:
- Education
- Banking & finance
- Trade and transport

- Presence of Vadodara Stock Exchange

### **6. Infrastructure & Development**

- Strong road and industrial infrastructure
- Balanced urbanization (major city + rural hinterland)
- Increasing investments in:
  - Industry
  - Education
  - Urban amenities

### **7. Key Socio-Economic Issues**

- Strengths
  - Industrially advanced district
  - High urban literacy and infrastructure
  - Significant contribution to Gujarat's economy
- Challenges
  - Tribal population development (high ST share)
  - Gender gap in literacy
  - Rural–urban disparities
  - Moderate sex ratio

### **8. Overall Assessment**

- Vadodara district presents a mixed but progressive socio-economic profile:
  - Economically strong due to industrialization
  - Socially diverse, with a large tribal population
  - Moderately developed, with visible inequalities between rural and urban areas.

Vadodara District is prone to multi hazards and experienced & witnessed too on several occasions in past. Past few decades Vadodara District faces number of hazards due to which normal lifestyle has been disturbed during that time period.

Natural Environment / Atmosphere get affected due to certain kind of chemical hazards mainly of industrial areas and its surroundings where the drinking water and the water used for farming get contaminated.

Vadodara district have experienced the effects of cyclone in 1998 due to which, most of the city area including Vadodara city has been affected, mainly temporary establishments like hoardings etc. has fallen down in the city areas of the whole district, roofs of the huts has flown away in certain villages which are on the river bank, trees were fallen down and the routine life has been disturbed.

Due to the effects of devastating earthquake of the year 2001, panic condition has been seen throughout the district, majorly the residents of the high-rise buildings has experienced the jolt of the quake, minor cracks have been notified in buildings and other structural establishments.

District faces the impact of major floods once in every three-year time. Majorly the District was severely affected by the floods of 1978, 1994, 2005, 2006, 2013, 2014, 2019 and 2024 almost the whole district was affected due to these hazards.

Due to road and rail accidents, major life losses have been observed in most of the urban part of the district from where the National highways / State highways / Express way and Railway lines passes through.

#### **Potential Hazards with respect to Vadodara District:**

| <b>Hazard</b>       | <b>Taluka under risk</b>                                                            |
|---------------------|-------------------------------------------------------------------------------------|
| Flood               | Vadodara City, Vadodara Rural, Karjan, Dabhoi, Sinor, Padra, Savli, Vaghodia, Desar |
| Cyclone             | No Coast Line is situated within 15 kms of District Boundary                        |
| Earthquake          | All taluka in Zone III                                                              |
| Drought             | All Taluka under Moderate risk                                                      |
| Industrial/Chemical | Vadodara City, Vadodara Rural, Padra, Savli, Waghodia                               |
| Biological Disaster | All Talukas                                                                         |
| Tsunami             | ----                                                                                |

#### **Criteria for Classification of Risk by Taluka:**

| <b>Hazard</b> | <b>Taluka are at severe risk</b>                                            | <b>Taluka are at moderate risk</b>                                         |
|---------------|-----------------------------------------------------------------------------|----------------------------------------------------------------------------|
| Flood         | Talukas which are affected by flood for more than 5 years in last ten years | Talukas which are affected by flood for at least 3 years in last ten years |

|                     |                                                                                                              |                                                                                               |
|---------------------|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Cyclone             | Talukas that fall between 0 to 7 Km distance from the sea                                                    | Talukas that fall between 7 to 15 km distance from the sea                                    |
| Earthquake          | Talukas falling under the Seismic Zone IV and V                                                              | Talukas falling under Seismic Zone II and III                                                 |
| Drought             | Talukas facing scarcity of drinking water for more than 5 years in last ten years                            | Taluka facing scarcity of drinking water for at least 3 years in the last ten years           |
| Industrial/Chemical | Talukas lying within vicinity of 5 Km from MAH units and/or vital industrial/ chemical/nuclear installations | Talukas lying within vicinity of 5-15 Km from MAH units and/or vital industrial installations |
| Tsunami             | Talukas that lie between 0 to 7 Km distance from the sea                                                     | Talukas that lie between 7 to 15 km distance from the sea                                     |

➤ **Cyclone**

There are possibilities of strong winds before monsoon, majorly in the river prone areas and city areas as well. As per the Disaster Calendar, the months of May to November are for advance preparation against cyclone. The main reason behind the loss to the properties is the loss due to weak construction (especially weak& connected roofs or ceilings).

➤ **Flood**

As mentioned in the Map-1 & Map-2 and Vadodara District is surrounded by several major and minor Rivers, Irrigation Ponds, different Water bodies and Dams in more than 300 villages along with city areas have the probability of floods due to various reasons. Details of affected villages by Rivers and Dams are included in Annexures.

Soil evasion occurs due to flood water/tidal water of the sea which results into salinity in the soil / poor fertility and the crossing of the soil or layers of unwanted elements on the soil and the soil becomes useless.

The foundations of the buildings are not so strong that can face the force of floodwater. Along with this, there is great damage to the fertile land due to floods. The fertile land becomes saline and thus crops are not possible on such infertile land.

Population / Density wise area / residents' details can be drawn from the City Disaster Management Plan / Ward Disaster Management Plan of VMC in case of city area, from Taluka Disaster Management Plan / City Disaster Management Plan of Municipalities for urban and rural areas of the district.

**Details of earthquake hazard-prone zone area, reason, effect in the district**

| Sr. | Hazard Prone Zone                                                        | Reason                                                                                                                                               | Effect                                                                                                                                                                          |
|-----|--------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.  | Vadodara District                                                        | Fault Line under District                                                                                                                            | Damage to human being & property                                                                                                                                                |
| 2.  | Vadodara, Padra, Savli, Karjan, Dabhoi, Waghodia, Sinor, Desar           | Dense population Taluka place of district                                                                                                            | ----- As above ----                                                                                                                                                             |
| 3.  | PCC, Nandesari, Vadodara, Padra, Savli, Waghodia and Makarpura GIDC area | High number of chemical factories, MAH chemical factories, other industries, high number of employees and ancillary business establishment & persons | Producing chemical hazard such as fire, explosion, toxic release, poisoning etc. as a result of rupture of tank & collapse of buildings. This can cause damage to human beings. |
| 4.  | PCC, Nandesari, Vadodara, Padra, Savli, Waghodia and Makarpura GIDC area | MAH Chemical factories and the places of availability of oil and Natural gas                                                                         | Fire, explosion, toxic release etc. from certain MAH factories as well as fire, explosion in oil well, which can damage to human beings and property                            |
| 5.  | Underground passing pipeline area                                        | Water, oil, chemical to a strong pipeline in district                                                                                                | Fire & explosion, which can cause damage to human beings & property. Interruption in industrial activity.                                                                       |
| 6.  | Road, railway and bridge area                                            | National highway, another taluka road, western railway                                                                                               | Traffic in interruption, shortage occur in essential commodity in district as well as state                                                                                     |
| 7.  | Dams, water storage area                                                 | Very near to district Ajwa, Pratappura and Dev Dam, GIDC water storages; industries reservoirs                                                       | Low lying areas will be flooded with water. There is shortage of drinking & industrial water. Thus, can cause harm to humans & interruption in industrial activity.             |

## **Accidents**

### **Road:**

The district has 3191 Kms length of pakka roads connecting to 426 villages/towns in the district. 249 villages are connected by kachha roads and 43 villages accessible only in fair weather. Out of the total 694 inhabited villages, 633 villages are connected by state road transport facilities. Thus probability of road accidents are there, and occurred on regular bases on State highways, National highways and Express highway passes through Vadodara district.

The State highway & National highway No.8 with Express way passes through this District. The villages along the State highway, Express way & the villages along the National highway are highly accident-prone areas.

Majorly, newly developed Vadodara - Mumbai 6 lane National high way, Fartikui - Thuvavi - Dabhoi state road, Vadodara - Jambusar national high way, Ahmedabad - Vadodara express way, Vadodara - Halol road are the most accident-prone zones due to heavy traffic and various types of transportation vehicles including heavy trucks, transport vehicles, oil / gas tankers transporting at high range.

### **Rail:**

Vadodara districts have in length railway lines which has covered almost half of the talukas of the district, total length of railway track is 557 kms in the District, out of that Broad Gauge length is 557 Kms and remaining is Meter gauge. Vadodara Railway Station is the main station in the city of Vadodara, Gujarat, India. The station is a major stop on the western railway zone of Indian railways. It has two railway lines, a straight line between Ahmedabad and Mumbai & the other being the line coming from Madhya Pradesh. Trains going towards northern region use Madhya Pradesh line while all the other trains use the Ahmedabad-Mumbai line.

There are no. of Non gated railway crossings in the district which leads the probability of railway accidents higher, Vadodara district has suffered from a tragedy of Samlaya Train accident in past.

### **Air:**

Aviation sector is a vital segment of strategic and economic environment of the modern state. Vadodara Airport or Civil Airport Harni is located in the north-east of, in the suburb of Harni. It is a domestic airport. The existing domestic terminal at Vadodara Airport is distinct from other airports due to its mix of Gujarati and architectural styles complete with domes on the roof. The terminal is small and cannot handle large numbers of passengers.

Vadodara has air connectivity with Mumbai, Delhi, Kolkata, Bangalore, Ahmedabad and Chennai. Number of domestic flights of different airlines has been operational through Vadodara airport, there may have chances of air accidents due to technical errors in the aircraft, aircraft crashing or the recent scenario of increased threat of hijacking. The primary responsibility is laid with the airport authority in such cases of air accidents / hijacking. The role of the District Administration is of secondary type as the district collector and other agencies head are with the Aerodrome Committee.

### **Fire:**

Vadodara district has a larger production of cotton/groundnut hence there are number of gins / oil mills where other cotton/groundnut is stored/processed. Due to high amount of storage, there are possibilities of fire also. With this number of incidents is reported on domestic fire like short circuits etc.

### **Industrial / Chemical Disasters**

There are collection centres, oil wells & refiners etc., kinds of risky industries along the State/National highways passing through the district. Besides, there are gas refilling stations, gas and oil pipelines, chemical plants, storages, bottling plant etc. in the district due to which there are chances of Fire & Accidents. Savli taluka and Karachiya village of Vadodara (R) Taluka experienced incidents of huge fire in the year 2009 and 2010. There are several incidents of chlorine / Ammonia gas leakage which have been observed during last five years in the district.

Vadodara is called capital of industries as most of industries are located or situated near the district so very high chances of risk of loss of property due to oil spill, leakage of gases and fire.

Industries have their own Onsite Emergency Management Plans to deal with onsite emergencies and the other major units like IOCL, BPCL etc. have developed their Disaster Management Plans.

Maintenance of permanently established machinery and shutdown mechanism can be monitored periodically with high concern, could be a major concern of risk in case of large-scale industries / petro chemical industries.

To deal with Industrial / Chemical disasters, separate Off site Emergency Plan -DM plans developed by Director Safety & Health - Vadodara, total coverage of Task force, Rescue Teams, Contact details, shelters, response mechanism etc. with MAH unit details and Annexes has been incorporated with the Plan and the same can be referred at the time of Offsite emergency.

Off-site Control Room (OCR) is functioning to take care of Industrial accidents particularly of MAH units. OCR is located at Material Bhavan, Reliance Industries Ltd., Petrochemicals, Vadodara.

#### **Details of Industrial Pockets:**

| No. | Name of Industrial Pockets             | Identification | MAH Units |        |       |
|-----|----------------------------------------|----------------|-----------|--------|-------|
|     |                                        |                | Working   | Closed | Total |

| 4. | Environmental risk – Due to man-made Natural Calamity disaster while transporting of chemical by road, rail & pipeline | Leakage, spillage, escaping, penetrate of toxic, flammable, explosive, radioactive, poisoning chemical liquid, vapors, dust, fume in atmosphere or on or in the land due to rupture of pipeline, on or in the land road transport containers / vessel, railway wagon, equipment failure as a result of natural calamities or manmade or combination of them disaster | Same as above | Same as above |

### **Drought:**

“Scarcity is a marked deterioration of the agricultural season due to the failure of rains or floods or damage to crops from insects resulting in severe unemployment and consequent distress among agricultural labours and small cultivators,” (Gujarat Relief Manual 1987: 14). In the old system of currency in India, one rupee was equal to 16 annas. Hence in the *Annawari* system, 4 annas meant 25% damage, 8 annas was 50% and so on.

As the state the Vadodara district follows the Anwari system, 20 of the assessing extent of crop failure because of failed monsoons: usually an Anwari of less than four is sufficient to declare a drought, though there is also provision for a partial drought. However, relief measures ranging from provision of drinking water (through tankers or even trains in severe cases), fodder supply for livestock and employment opportunities are typically short-term and end once the next agricultural season begins.

Probability of drought is very rare which may occur with certain blocks of Vadodara district only due to the following impacts:

### **Impacts of climate change** (hydro-meteorological issues):

- Increase in temperature
- Variation in monsoon rain (extreme summer rainfall, decrease in number of rainy days)
- Continuation of dry days
- Decrease in runoff and water availability in arid and semi-arid area

### **Actions for adaptation and coping with drought** (development issues):

- Water management
  - Deepen well, utilize water supply system properly
  - Construct check-dam, artificial dam, integrated water shed management, conserve water, rainwater harvesting system
- Agriculture
  - Improve agronomic practice, drought tolerant seeds
  - Soil conservation, seeds conservation
- Animal husbandry
  - Migration, utilize fodder bank, cattle camp
  - Control livestock population, conserve fodder
- Local economy
  - Engage in non-agriculture labor work, relief work, loans
  - Secure income from other livelihoods, craft

### **Local Government Policy measures**

- Focus on development-oriented drought mitigation
- Utilize drought relief fund on regular development practice
- Incorporate future climate scenario in drought proofing plans
- Enhance climate prediction capability through link to hydro meteorological organizations

### **Epidemics:**

Probability is almost certain due to increase in Human Disease (Water borne disease, air borne disease and vector borne disease) along with that animal disease so impact will be very high according to that vulnerability is very high.

Majorly the people of urban area residing in Vadodara district is affected by various types of Vectors born decease and Water born decease during the monsoon season.

Frequent epidemics, especially during monsoon are a common aspect for Vadodara district.

Vadodara district is endemic to various water-borne diseases such as Cholera, Leptospirosis and Malaria. Several relatively minor ailments such as Diarrhoea are more common during the monsoon. Most importantly, there is always a danger of epidemics breaking out after floods arising due to different factors – inundation of wells under contaminated sewage water, wading through such flooded water. There is contamination of groundwater as well as well water in such circumstances. Well water can be contaminated directly when sewage water enters the well during inundation

### **2.1.2 Matrix of Past disasters in the district**

| <b>No.</b> | <b>Disaster</b>                   | <b>Month &amp; Year<br/>(Last occurrence)</b>             | <b>Damages</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

### Traditional Coping Capacity:

It is important to identify and recognize traditional coping capacity of the community to enable them to enhance their capacity to withstand disasters.

| Hazard                     | Early Warning                                 | Preparedness                                      | Early Response                                      |
|----------------------------|-----------------------------------------------|---------------------------------------------------|-----------------------------------------------------|
| Flood                      | Monitoring of water courses through community | Identified high elevation places and rescue teams | Evacuation, search and rescue and first aid support |
| Cyclone                    | Information through fisher folks              | Evacuate to safe place                            | Search and rescue and first aid support             |
| Earthquake                 | -                                             | Identification of safe places                     | Search and rescue and first aid support             |
| Drought                    | Own assessment mechanism                      | Fodder storage, food storage at individual level  | Panjrapol                                           |
| Industrial/Chemical Hazard | Local Administration                          | OCR, DISH and EOC                                 | Local response Teams                                |
| Tsunami                    | -                                             | Evacuate to safe place                            | Search and rescue and first aid support             |

### Summary of Capacity against flood:

| Details                     | No.  |
|-----------------------------|------|
| Villages at risk            | 184  |
| Swimmer                     | 1222 |
| Emergency / Rescue Shelters | 159  |

|                            |      |
|----------------------------|------|
| Govt medical practitioners | 58   |
| Nurses                     | 267  |
| Cattle shed (Panjrapol)    | 3    |
| Machine boats              | 12   |
| Simple Boats               | 29   |
| Fiber Boat                 | 26   |
| Rubber Boat                | 29   |
| Life Jackets               | 636  |
| Rings                      | 1171 |
| Rope 200 ft                | 245  |
| Rope 100 ft                | 262  |
| Life Buoy                  | 400  |

#### Summary of Capacity against earthquake:

| Details                     | No. |
|-----------------------------|-----|
| Emergency / Rescue Shelters | 159 |
| Govt Doctors                | 58  |
| Nurses                      | 267 |
| Dumpers                     | 35  |

#### Capacity against industrial and chemical disaster:

| Particular                                                     | Unit (no.) |
|----------------------------------------------------------------|------------|
| Special Response Teams (SRTs) readily available for Industries | Yes        |
| Trained personnel at District level                            | 164        |
| Fire Fighters (Private) & (Govt)                               | 50         |
| Govt doctors                                                   | 58         |

#### 2.1.2.7 Hazard Risk Vulnerability Assessment

The **Hazard** technically is not a disaster unless the 'Trigger' set it off. It could be weak legislation that failed to regulate the functioning of the facility. The Risk and Vulnerability factors analyzed from these Hazards vary from Minor to Major impacts affecting the smaller or larger areas of the district.

"**Risk** is a technical concept, which is used by engineering and management specialists to arrive at an estimation of losses in the event of disaster and the expected probability of its occurrence."

$$\text{Risk} = \frac{\text{Hazards} \times \text{Vulnerability}}{\text{Coping Capacity}}$$

Coping Capacity

**"Vulnerability** gives the extent to which a community is affected by a disaster".

The idea of danger or threat points out the possibility of physical events capable of causing damage, like earthquakes, floods, industrial accidents etc. The vulnerability brings to light the structural susceptibility of society or social groups suffering harm, based on physical events constituting a "Threat". Vulnerability concerns the relationship between the social, economic and physical elements, on which the wellbeing of the society or the group in question depends. The analysis of vulnerability is specific and based on the type of danger or threat which is apprehended.

The table below summarizes the results of an analysis of impact of Hazard, risk and Vulnerability of disaster in Vadodara is as below. This analysis indicates that disaster planning at Vadodara district level should first focus on the functional response to the Flood, Industrial Accidents and Earthquakes which triggers to the other hazards like Dam Failure, Water logging, Fire, Failure of critical infrastructure and building collapse.

#### **2.1.2.8 Authority/Agency Conducting HVCRA**

**HVCRA is typically carried out by:**

District Disaster Management Authority (DDMA), Vadodara

Gujarat State Disaster Management Authority

National Disaster Management Authority (guidelines & support)

**Line departments:**

Irrigation Department

Health Department

Public Works Department (PWD)

**Technical agencies:**

Remote sensing and GIS institutions

Academic institutions

### **2.1.2.9 Tools, Techniques & Methodology Used in HVCRA**

#### **A. Tools**

GIS & Remote Sensing

Satellite imagery for hazard mapping

GPS surveys for field data collection

Disaster management software/databases

#### **B. Techniques**

Hazard zonation mapping

Vulnerability analysis (social, economic, infrastructural)

Capacity assessment (resources, response systems)

Risk matrix preparation (probability vs impact)

#### **C. Methodology (Step-by-Step)**

Data Collection

Historical disaster records

Census and socio-economic data

Infrastructure data

Hazard Identification

Natural hazards (flood, drought, earthquake)

Man-made hazards (industrial, transport accidents)

Vulnerability Assessment

Population at risk (tribal, poor, dense areas)

Critical infrastructure (bridges, roads, hospitals)

Capacity Assessment

Availability of:

Hospitals

Fire stations

Emergency services

NGOs and community networks

Risk Analysis

Combining hazard + vulnerability – capacity

Ranking risks based on severity and likelihood

Preparation of Risk Maps & Reports

GIS-based outputs

Identification of high-risk zones

# **CHAPTER 3**

## **INSTITUTIONAL ARRANGEMENT OF DM**

### **3.1 D.M. organizational structure at the national level,**

Prime Minister

NDMA (Policy Making)

NEC (Implementation & Coordination)

Line Ministries / Departments

NDRF (Response Force) + NIDM (Training & Research)

#### **National-Level Organizational Structure (DM Act, 2005)**

The Disaster Management Act 2005 establishes a multi-tier institutional system for disaster management in India, with the national level at the top.

#### **1. Apex Body: National Disaster Management Authority (NDMA)**

National Disaster Management Authority

Chairperson: Prime Minister of India

Members: Up to 9 (appointed by PM)

Functions

Lay down national disaster management policies

Approved National Disaster Management Plan

Issue guidelines to states and ministries

Coordinate enforcement and implementation

## **2. National Executive Committee (NEC)**

National Executive Committee

Chairperson: Union Home Secretary

Members: Secretaries of key ministries

Functions

Assist NDMA in implementation policy

Prepare the National Plan

Coordinate response during disasters

Monitor implementation of policies

## **3. National Disaster Response Force (NDRF)**

National Disaster Response Force

Functions

Specialized force for disaster response

Handles:

Search & rescue

Evacuation

Relief operations

## **4. National Institute of Disaster Management (NIDM)**

National Institute of Disaster Management

## Functions

Training and capacity building

Research and documentation

Development of guidelines and best practices

## **5. National Disaster Management Plan (NDMP)**

Prepared by NEC and approved by NDMA

Includes

Risk assessment

Mitigation strategies

Preparedness and response plans

## **6. National Fund Mechanisms**

### **a) National Disaster Response Fund (NDRF)**

For emergency response and relief

### **b) National Disaster Mitigation Fund (NDMF)**

For mitigation and prevention projects

## **7. Role of Central Government**

Coordinate with states

Provide financial and technical assistance

Deploy armed forces if required

Ensure integration of disaster management into development planning

### **3.2 D.M. organizational structure at the state level including Incident Response System(IRS) in the State**

#### **1. State Disaster Management Authority (SDMA)**

State Disaster Management Authority

Chairperson: Chief Minister

Members: Up to 8 (appointed by CM)

Functions

Lay down state disaster management policy

Approved State Disaster Management Plan

Issue guidelines to departments and districts

Ensure integration of disaster risk reduction into development

#### **2. State Executive Committee (SEC)**

State Executive Committee

Chairperson: Chief Secretary

Members: Secretaries of key departments

Functions

Implement policies of SDMA

Prepare State Disaster Management Plan

Coordinate departments during disasters

Monitor preparedness and response

### **3. State Disaster Response Force (SDRF)**

State Disaster Response Force

Functions

State-level specialized response force

Supports rescue, evacuation, and relief

Works with National Disaster Response Force when needed

### **4. Line Departments (Operational Units)**

Key departments involved:

Home Department

Health Department

Police

Fire & Emergency Services

Public Works Department (PWD)

Irrigation Department

Role

Execute disaster management functions within their sectors

### **5. State Disaster Management Plan (SDMP)**

Prepared by SEC and approved by SDMA.

Includes

Hazard risk assessment

Mitigation strategies

Preparedness and response plans

Resource inventory

## **6. Financial Mechanisms**

State Disaster Response Fund (SDRF) → Emergency relief

State Disaster Mitigation Fund (SDMF) → Mitigation projects

Incident Response System (IRS) at State Level

The IRS is a standardized emergency response framework for managing disasters efficiently.

### **1. Overall Structure**

At State Level:

Responsible Officer (RO) Usually Chief Secretary / Relief Commissioner

State Incident Commander (IC) Appointed during disaster (senior official)

### **2. IRS Functional Sections**

#### **a) Operations Section**

Handles:

Search & rescue

Evacuation

Relief operations

#### **b) Planning Section**

Collects and analyzes information

Prepares Incident Action Plan (IAP)

c) Logistics Section

Provides:

Equipment

Transport

Communication support

d) Finance & Administration Section

Managers:

Expenses

Compensation

Resource accounting

**4. Key Features of IRS**

Clear chain of command

Unity of command (one supervisor per unit)

Flexible and scalable structure

Coordination across departments

Conclusion

The DM Act, 2005 ensures a well-defined state-level disaster management system, supported by the IRS for efficient on-ground response.

Together, SDMA + SEC + SDRF + IRS ensure:

Policy + Planning + Execution + Real-time response

### **3.3 D.M. Incident Response Structure in the District**

#### **1. District Disaster Management Authority (DDMA)**

District Disaster Management Authority

Composition

Chairperson: District Collector / District Magistrate (DM)

Co-Chairperson: Chairperson of Zilla Parishad

Members:

Superintendent of Police (SP)

Chief Medical Officer

Executive Engineers

Other district officials

#### **2. Functions of DDMA**

Prepare District Disaster Management Plan (DDMP)

Identify hazard-prone areas

Coordinate response during disasters

Ensure implementation of state and national policies

Promote awareness and capacity building

Monitor preparedness at local levels

### **3. District Disaster Management Plan (DDMP)**

Prepared by DDMA.

Includes

Hazard, Risk & Vulnerability Assessment (HRVA)

Resource inventory (equipment, manpower)

Mitigation and preparedness strategies

Response and evacuation plans

### **4. Line Departments at District Level**

Key departments:

Police

Health

Fire Services

Public Works Department (PWD)

Irrigation

Agriculture

Role

Provide sector-specific disaster response and support

### **5. Emergency Operations Centre (EOC)**

Established at district headquarters

Functions

24×7 monitoring of disasters

Information collection and dissemination

Coordination between departments

## **6. District Disaster Response Mechanism**

District-level teams for:

Search and rescue

First aid and medical care

Relief distribution

Supported by:

State Disaster Response Force

National Disaster Response Force (if required)

Incident Response System (IRS) at District Level

The IRS is actively implemented at the district level for on-ground disaster response.

### 1. Key Positions

Responsible Officer (RO) → District Collector

Incident Commander (IC) → Appointed officer (often ADM/SDM)

### 2. IRS Functional Sections

#### a) Operations Section

Rescue, evacuation, relief

#### b) Planning Section

Situation analysis and Incident Action Plan

c) Logistics Section

Resources, transport, communication

d) Finance & Administration Section

Expenses, compensation, records

3. Field-Level Structure

Sub-Divisional Magistrate (SDM)

Tehsildar

Block Development Officer (BDO)

Village-level functionaries

### District level Response Structure Model

### District level Response Structure (IRS)

### Flow chart of District Administrative Setup

### Linkages of District with State and National level

### Taluka level Structure

## 1. IRS Organizational Structure: IRT Framework

As per NDMA's IRS guidelines, IRT at District, Sub-Division, Tehsil and Block level should be constituted under the written directives of District Magistrate (DM). These teams will include experienced officers / employees at all levels and respond to all natural and man-made disasters. The lowest administrative unit (Sub-Division, Tehsil or Block) will be the first responder as the case may be. IRT at all levels will have the same structure, i.e. IC supported with Operations, Planning and Logistics Sections. The IRTs are to be pre-designated at all levels.

### A. IRT Framework - District Level

In general, the selection of Section Chiefs is made according to the suitability and capability of the officer. The selection of the Operations Section Chief, however, depends on the nature of the disaster. In case of floods and earthquakes reaching the affected area, rescuing the affected people and providing relief to them is the main task of the responders. People have to leave their home in a hurry, and they are not able to take away their valuables. These abandoned houses become vulnerable. The relief materials while being transported also become prone to loot. In such cases, Police and the Armed Forces are the best suited to handle and lead the operations. In case of fire, it will be the District Fire Officer who will be appropriate officer to handle the situation. In case of health related disaster, it would be the District Chief Medical Officer and so on.

## **A. Major Responsibilities and Duties**

### **INCIDENT COMMAND**

The Incident Command's responsibility is the overall management of the incident. It is comprised of following positions:

#### **Incident Commander**

The Incident Commander has a wide variety of responsibilities.

- Assess the situation and/or obtain a briefing from the prior Incident Commander.
- Determine incident objectives and strategy.
- Establish the immediate priorities.
- Establish an Incident Command Post.
- Establish an appropriate organization.
- Ensure planning meetings are scheduled as required.
- Approve and authorize the implementation of an Incident Action Plan.
- Ensure that adequate safety measures are in place.
- Coordinate activity for all Command and General Staff.
- Coordinate with key people and officials.
- Approve requests for additional resources or for the release of resources.
- Keep the agency administrator informed of incident status.
- Approve the use of students, volunteers, and auxiliary personnel.
- Authorize release of information to the news media.
- Order the demobilization of the incident when appropriate.

#### **Information and Media Officer**

The Information and Media Officer is responsible for developing and releasing information about the incident to the news media, to incident personnel, and to other appropriate agencies and organizations. Reasons for the Incident Commander to designate an Information and Media Officer:

- An obvious high visibility or sensitive incident.
- Reduces the risk of multiple sources releasing information.
- Need to alert, warn or instruct the public.
- Media demands for information may obstruct IC effectiveness.

- Media capabilities to acquire their own information are increasing.

### **Liaison Officer**

The Liaison Officer is the point of contact to assist the first responders, cooperating agencies and line departments. It may be designated depending on the number of agencies involved and the spread of affected area. Reasons to establish the Liaison Officer position at an incident:

- When several agencies send, or plan to send, Agency Representatives to an incident in support of their resources.
- When the IC can no longer provide the time for individual coordination with each Agency Representative.
- When it appears that two or more jurisdictions may become involved in the incident and the incident will require on-site liaison.

### **Safety Officer**

The Safety Officer's function is to develop and recommend measures for ensuring safety of responders and to assess or anticipate hazardous and unsafe situations and review it regularly. The Safety Officer will correct unsafe situations by working through the chain of command, however, the Safety Officer may exercise emergency authority to directly stop unsafe acts if personnel are in imminent life-threatening danger.

### **GENERAL STAFF**

Each one has a vital role for efficient response; however, depending upon the nature and requirements of the incident, they may be or not be activated. Each of these functional areas can also be expanded as needed into additional organizational units with further delegation of authority.

### **Operations Section**

The Operations Section deals with all types of field level tactical operations directly applicable to the management of an incident. This section is headed by an Operation Section Chief (OSC). In addition, a deputy may be appointed to assist the OSC for discharging his functions depending on the magnitude of the workload. Operations Section is further sub-divided into Branches, Divisions and Groups which assist the OSC/IC in the execution of the field operations.

## **Planning Section**

The Planning Section deals with all matters relating to the planning of the incident response. Headed by the Planning Section Chief, this section helps the Incident Commander in determining the objectives and strategies for the response. It works out the requirements for resources, maintains up-to-date information about the ongoing response and prepares IAP. For the closing phase of the operations, the Planning Section also prepares the Incident Demobilization Plan.

## **Logistics Section**

The Logistics Section deals with matters relating to procurement of resources and establishment of facilities for the incident response. This section is headed by the Logistics Section Chief and is an important component of the IRS organization for providing back end services and other important logistic support like communications, food, medical supplies, shelter and other facilities to the affected communities and responders as well. There is a Finance Branch attached to this Section in order to ensure that the procurements, if any, may be done quickly and in accordance with the financial rules.

### **1. Triggering Mechanism for Deployment of IRS**

Some of the natural hazards have a well established early warning system. On receipt of information regarding the impending disaster, the Emergency Operations Center (EOC) will inform the Responsible Officer (RO), who in turn will activate the required IRT and mobilize resources. At times the information about an incident may be received only on its occurrence without any warning – in such cases the local IRT will respond and inform the higher authority and if required seek reinforcement and guidance.

### **2. Activation of IRS in the District**

Before taking up response activities, the DM (RO/IC as per IRS) will hold a briefing meeting and take stock of the situation, availability and mobilization of resources for listing out the various tasks and to provide proper briefing to the responders. The IAP will be drawn and put into action based on the situation assessment. The DM/RO will nominate Operations Section Chief (OSC) based on “incident type” and rest will follow as per IRS/IRT and other procedural guidelines.

On activation of IRS, all line departments/organizations/individuals shall follow the directions of the Incident Commander as condition demands. He can divert all mechanisms and resources in the

district to fight against a scenario leading to disaster/calamity in the district. All Section Chiefs (Operations, Planning and Logistics) are vested with commanding authority and logistic assistance to deliver the concerned responsibility.

### **1. Incident Action Plan**

It is important that activities indicated in the IAP are connected with the functional responsibility defined in IRT and also according to other descriptions as per DDMP. For instance, proper links shall be established between IRT and Emergency Support Functions (ESF) for IAP effectiveness. Three basic elements of IAP are: Task /Function /Activity, Department/Officer Responsible, and Time. Besides that, common forms used for performing IRS and IAP as given in IRS National Guidelines may be utilized.

### **2. Standard Operating Procedures**

Standard Operating Procedures (SOPs) are a common method of implementing instructions. SOPs provide response protocols for carrying out specific responsibilities. They describe the “who, what, when and how” during a disaster, helping responders to perform complex tasks with high level of coordination. SOPs should be prepare and annexed to the DDMP for all relevant hazards of the district, such as earthquake, flood, cyclone, landslide, tsunami, man-made disasters, etc. It should be based on pre-defined IRTs and ESFs and communicated to every stakeholder in advance.

# FUNCTIONAL RESPONSIBILITIES

|                       |                                                                                        |
|-----------------------|----------------------------------------------------------------------------------------|
| RESPONSIBLE OFFICER = | PRIMARILY RESPONSIBLE FOR<br>EFFECTIVE RESPONSE                                        |
| COMMAND =             | OVERALL INCHARGE OF THE INCIDENT<br>RESPONSE TEAM AND ITS EFFECTIVE<br>FUNCTIONING     |
| OPERATIONS =          | DIRECT AND SUPERVISE ALL TACTICAL<br>ACTIONS                                           |
| PLANNING =            | COLLECT/ANALYZE DATA, WORKOUT NEED<br>OF REQUIRED RESOURCES AND PREPARE<br>ACTION PLAN |
| LOGISTICS & FINANCE = | PROVIDE LOGISTICS SUPPORT,<br>ROCUREMENT AND COST ACCOUNTING                           |

**LIST OF IRS POSITIONS AND SUITABLE OFFICERS IN THE DISTRICT**

| IRS Position                    | Suitable officers                                                                                                                                                                                                                               |

The District administration of Vadodara has identified 16 expected task forces for key response operation functions that are described below. Additional taskforces can be added under the operations section as needed by the circumstances of a disaster. Each Taskforce is led by one organization and supported by other organizations.

| <b>Emergency Operation Taskforce</b>                                        | <b>Functions</b>                                                                                                                                             |
|-----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Coordination and Planning                                                | Coordinate early warning, Response & Recovery Operations                                                                                                     |
| 2. Administration and Protocol                                              | Support Disaster Operations by efficiently completing the paper work and other Administrative tasks needed to ensure effective and timely relief assistance  |
| 3. Warning                                                                  | Collection and dissemination of warnings of potential disasters                                                                                              |
| 4. Law and Order                                                            | Assure the execution of all laws and maintenance of order in the area affected by the incident.                                                              |
| 5. Search and Rescue (including Evacuation)                                 | Provide human and material resources needed to support local evacuation, search and rescue efforts.                                                          |
| 6. Public Works                                                             | Provide the personnel and resources needed to support local efforts to reestablish normally operating infrastructure.                                        |
| 7. Water                                                                    | Assure the provision of sufficient potable water for human and animal consumption (priority), and water for industrial and agricultural uses as appropriate. |
| 8. Food and Relief Supplies                                                 | Assure the provision of basic food and other relief needs in the affected communities.                                                                       |
| 9. Power                                                                    | Provide the resources to reestablish normal power supplies and systems in affected communities.                                                              |
| 10. Public Health and sanitation (including First aid and all medical care) | Provide personnel and resources to address pressing public health problems and re-establish normal health care systems.                                      |

|                                |                                                                                                                                                                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11. Animal Health and Welfare  | Provision of health and other care to animals affected by a disaster.                                                                                                                                                           |
| 12. Shelter                    | Provide materials and supplies to ensure temporary shelter for disaster-affected populations                                                                                                                                    |
| 13. Logistics                  | Provide Air, water and Land transport for evacuation and for the storage and delivery of relief supplies in coordination with other task forces and competent authorities.                                                      |
| 14. Survey (Damage Assessment) | Collect and analyses data on the impact of disaster, develop estimates of resource needs and relief plans, and compile reports on the disaster as required for District and State authorities and other parties as appropriate. |
| 15. Telecommunications         | Coordinate and assure operation of all communication systems (e.g.; Radio, TV, Telephones, Wireless) required to support early warning or post disaster operations.                                                             |
| 16. Media (Public Information) | Provide liaison with and assistance to print and electronic media on early warning and post-disaster reporting concerning the disaster.                                                                                         |

The specific response roles and responsibilities of the taskforces indicated above is that these roles and responsibilities will be executed and coordinated through the IRS/GS system.

Warning, Relief and Recovery actions are intended to eliminate the loss of life and property and hardship due to disasters. DM Plans and SOPs of different levels, sectors and departments have their own early warning mechanism and imply the same at the time of disaster , further planning for relief and recovery assistance to the affected people have been done during the course of disaster to avoid or reduce losses and hardship.

In Vadodara district the Collector/ DEOC is the focal point for early warning, relief and recovery aspect, who directs and coordinates these efforts within the district. Collector / DEOC coordinate in early warning, relief and recovery and share / report the steps taken in these regards with similar activities in neighboring districts and with the GSDMA and Revenue Department.

### Early Warning Action Plan

The availability of early warning system is a must before early warning message could be disseminate to the people till the last mile. Thus for every type of disaster there is an agency designated with the responsibility of keeping track of developments in respect of specific hazards and inform the designated authorities/agencies at the district level about the impending disaster. Nodal agencies for early warning of different natural hazards are:

| Type of Action                                  | Flood                                                                                                | Cyclone                                                      | Chemical and industrial accidents                                           |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|-----------------------------------------------------------------------------|

With these Control Rooms, the Railways control Room, ST Department control Room, BSNL control room, MGVCL control room, with these all, Off-site Control Room (OCR) functioning to take care of Industrial accidents particularly of 81 MAH units of district. OCR located at Material Bhavan, Reliance Industries Ltd., Petrochemicals, and Vadodara. One of its wireless set is based at DEOC, and both DEOC and OCR closely work together at the time of Emergencies.

The actual plans developed by prime and supporting departments/agencies/organizations for each disaster may result in a variation in the actual composition of each taskforce.

Once this DDMP activated, these lead and supporting organizations create taskforces to accomplish the task as directed by the incident commander and appropriate section or unit leader. In addition, each taskforce lead organization will provide a report detailing activities undertaken and lessons learned during any disaster response operations. This report will be in addition to any purpose –specific reporting during the operation.

### **Emergency Communication Systems**

Communication system is very crucial for effective control of any disaster. The communication philosophy adopted by Disaster Management team during the disaster is as under:

In the event of collapse of any communication facility / Communication infrastructure as a cascading effect/consequence of disaster, Telecommunication Task Force Leader shall ensure immediate restoration of such facility or infrastructure to ensure uninterrupted communication for effective disaster management operations.

### **Radio Communication**

All the Control Rooms are equipped with hand held radios and all the task force leaders and their teams are having the hand held radio sets at their respective control rooms. The different user groups are operating at different frequency channels allotted to them for ease in communication in respective groups. At present, “Hand held radio sets” are with the District Magistrate, DDO, DSP, fire Brigade and Forest department. If possible, Health Personnel may be given these sets later.

### **Telephones**

Telephone facility is available with all the Control Rooms.

### **Alternate Communication System**

There could be a situation when all the communication facilities and systems may come to halt due to collapse of communication facilities/infrastructures. In the event of such a failure, till the facility/infrastructure is restored made functional, following alternate systems shall be used based on the seriousness of the situation.

### **Satellite Communication System**

Satellite communication shall be activated once all the communication systems fail. This facility is with DEOC. The Telecommunication Task Force Leader shall ensure that this facility is resumed on all such occasions.

### **Messengers**

- Use of messengers as a last resort to carry the hand written messages to people concerned in dealing with the disaster.
- A dedicated vehicle shall be made available by the Transport Task Force Leader upon request.

#### **Right use of Communication facility**

- The sense of urgency that everyone experiences during disaster may lead to a chaotic situation if communication systems are not properly used.
- Communication shall be brief and simple.
- Telephones, Cell phones, Hot Lines shall be used whenever required.

The table below describes the taskforce action plans are intended to identify key actions:

- Before a disaster
  - At the time of warning
  - As the disaster occurs and
  - In periods from:
    - 12 to 48 hours
    - 48 to 72 hours
    - 72 hours and beyond after a disaster
- The action plans serve as quick reference guide to individual task force members, as to what specific taskforces expect to be doing at specific stages before and after a disaster. This information will improve coordination within and between taskforces and with authorities outside Vadodara district.

#### **ommunication Flow Chart during Disaster Management**

### **3.5 Forecasting and warning Agencies**

#### **Emergency Support Functions**

- **Coordination and Planning:** Coordinate early warning, response and recovery operations.

**Task Force Leader: Collector**

## **CHAPTER 4**

# **Prevention and Mitigation Measure**

#### **4.1 PREVENTION MEASURES:**

“Mitigation” means a measure aimed at reducing the impact or effects of a disaster.

“Prevention” means measures the object of which is to avoid the occurrence of a disaster

“Reconstruction” means repair and construction of a property undertaken after a disaster

“Rehabilitation” means any activity the objects of which is to restore normalcy in conditions caused by a disaster.

“Emergency Preparedness” means the state of readiness which enables stakeholders to mobilize, organize and provide relief to deal with and impending or actual disaster or the effects of a disaster; One of the mitigation step is the proposed project of VMSS for Vishwamitri river, 4,500 slum-dwellers shifting from the riverbank of Vishwamitri

Many of Boribandhs have been created throughout the district with dual purpose of water recharging and prevention of flooding.

Proposed Project of VMC for widening of Vishwamitri River for flood mitigation.

Natural drainage system passes through Undera - Karachiya has been designed accordingly to reduce the flooding problem due to this drainage problem.

Widening of city roads due to which the traffic problem as well as the road accidents problem reduced.

Encroachment has been done near Bhukhi kaans area, the natural drainage system has been cleared, and the habitants resided near Bhukhi kaans (one of the natural drainages) has been rehabilitated to Vadsar and Jambua Village of Vadodara.

To respond in emergencies of all districts of south Gujarat Region the ERC (Emergency Response Centre) has been established near Darjipura village, in support of ERC, 10 Acre land has been allotted to NDRF (National Disaster Response Force) near Jarod Village in Waghodia Taluka of Vadodara District.

The services of 108 has been introduced in full fledge which provide the emergency health support to the victims in case of almost all kind of man - made and natural hazards and also routine healthcare emergencies in the district.

Offsite Control Room situated at RIL, Undera village near Vadodara, specially meant for response, preparedness and other DM aspects in case of Industrial accident, has been more active, the OCR is well equipped with Communication instruments like, Mobile, wireless sets etc. the same relates to DEOC for direct communication in case of industrial accidents.

## **MITIGATION MEASURES:**

A Disaster Risk Management (DRM) Programme is a planned system designed to reduce the risks and impacts of disasters through prevention, preparedness, response, and recovery activities. It helps communities, governments, and organizations protect lives, property, and the environment from natural and man-made disasters.

The programme focuses on identifying hazards such as floods, earthquakes, cyclones, fires, and epidemics, and taking steps to minimize their effects. DRM includes activities like risk assessment, public awareness, emergency planning, training, early warning systems, rescue operations, and rehabilitation.

Main Components of DRM

Mitigation – Reducing disaster risks before they occur

Preparedness – Planning and training for emergencies

Response – Immediate action during disasters

Recovery – Rebuilding and restoring normal life after disasters

Importance of DRM

Saves human lives

Reduces economic losses

Protects infrastructure and environment

Improves community resilience

Supports sustainable development

In India, disaster management is coordinated by organizations such as the National Disaster Management Authority and the National Disaster Response Force under the Disaster Management Act

## **The Yuva Aapda Mitra Scheme**

(YAMS) is a disaster management volunteer training program launched under the guidance of the National Disaster Management Authority (NDMA), Ministry of Home Affairs, Government of India.

Its main goal is to train young volunteers to act as first responders during disasters such as floods, earthquakes, cyclones, landslides, fires, and other emergencies.

Key Features of the Scheme

Youth receive disaster preparedness and rescue training

Training includes:

First aid

Search & rescue

Fire safety

Emergency response

Evacuation techniques

Snakebite and survival awareness

Volunteers are trained for about 7 days residential programs in most states.

Who Can Participate?

The scheme mainly targets youth volunteers from organizations such as:

NCC

NSS

Nehru Yuva Kendra Sangathan (NYKS)

Bharat Scouts & Guides

Generally, applicants should:

Be Indian citizens

Be physically fit

Usually fall in the age group of 18–40 or 18–45 years (varies by state).

Benefits for Volunteers

Participants may receive:

Training certificate

Identity card

Emergency Response Kit (ERK)

Uniforms and safety equipment

Insurance coverage (in some states up to ₹5 lakh)

Disaster response skills useful for community service and future opportunities.

Scale of the Program

NDMA plans to train over 2.37 lakh youth volunteers across multiple states and districts under the expanded Yuva Aapda Mitra initiative.

|                                                                   |  |               |  |         |
|                                                                   |  |               |  |         |
| Buildings and trainings for<br>mason, engineers and<br>architects |  |               |  |         |

- Industrial (Chemical) Structural Measures (in coordination with LCG, DCG district and state level authorities)

| Structural measures                                          | Activities                                                                                            | Implementing Departments                           | Convergence with agency/ program | Time Frame       |
|--------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|----------------------------------------------------|----------------------------------|------------------|
| Monitoring impact of industries on NRM (land, water and air) | Data collection of impact on natural resources (ground water monitoring wells, air quality test, etc) | DDMC, TDMC, LCG, GPCB                              |                                  | Regular interval |
| Safety assessment                                            | Carry out structural safety inspection/audit                                                          | DISH, DCG, LCG ( Dy. Industrial safety and health) |                                  | Regular interval |

- Industrial (Chemical) Non-Structural Measures (in coordination with LCG, DCG district and state level authorities)

| Non structural Measures | Activities                                   | Implementing Departments | Convergence Agencies | Time Frame       |
|-------------------------|----------------------------------------------|--------------------------|----------------------|------------------|
| Planning                | Prepare an onsite and offsite emergency plan | Occupier, DISH           |                      | 2025-26          |
|                         | Conduct mock drills as per the regulations   | DCG, DISH and LCG        |                      | regular interval |
|                         | Update the plan as per the requirement       | Occupier, DISH           |                      | regular interval |

|            |                                                                                                                                       |                                |  |                  |
|------------|---------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|--|------------------|
|            | Monitor similar activities in all the factories/ industries                                                                           | DISH and LCG                   |  | regular interval |
| Capacity   | Develop IEC material for                                                                                                              | DDMC,TDMC                      |  | 2025-26          |
| Building   | Publication & Distribution                                                                                                            |                                |  |                  |
|            | Awareness generation to general public and medical professional residing near MAH factories for immediate steps                       | DDMC,TDMC, LCG                 |  | 2025-26          |
|            | Organize training programmes, seminars and workshops (e.g. for drivers of HAZMAT transport, line departments officers, Mamlatdar etc) | DDMC, TDMC, LCG                |  | 2025-26          |
|            | List of experts/ resource person/ subject specialist (District emergency Off site plan)                                               | DDMC,TDMC, LCG                 |  | 2025-26          |
|            | Encourage disaster insurance                                                                                                          | Labour & employment department |  | 2025-26          |
| Medical    | Listing of hazardous chemicals and gases.                                                                                             | Occupier, DCG, LCG, DISH, BHO  |  | 2025-26          |
|            | Keep check on availability and validity of relevant antidotes for chemical hazards prevalent in District                              | Occupier, DCG, LCG, DISH, BHO  |  | 2025-26          |
|            | Workshops and trainings for medical professionals to handle potential chemical and industrial hazard                                  | BHO, DCG, Occupier, LCG, DISH  |  | Regularly        |
| Compliance | Environmental Protection Act, Factory Act, Mutual Aid SOPs                                                                            | DISH , GPCB                    |  | Regular interval |
|            | Any other                                                                                                                             |                                |  |                  |

At District level, the District Crisis Management Group (DCG) is an apex body to deal with major chemical accidents and to provide expert guidance for handling them.

## **CHAPTER 5**

### **preparedness Measures**

## **5.1 Introduction**

In the context of Vadodara district and Gujarat State in general the Disaster Management perspective has been followed in three phases, i.e. pre, during and post disaster management activities. The pre-disaster phase includes prevention, mitigation, and preparedness activities. These activities involve Extensive Data collection, maintaining Directories of resources, developing Action plans, Capacity building, Training and Community awareness activities among others. District administration, other Government departments, local authorities and other relevant agencies have already been formulated / working on the plans for prevention and mitigation of disasters and will build the capacity and ensure preparedness in the event of a disaster taking place. The private sector, NGOs and the community actively co-operate with the relevant agencies and participate in the training and other activities, which are conducted to augment their disaster management capabilities.

In this context, District Administration, Vadodara Municipal Corporation and different Government Line departments act as the nodal agency for mitigation, preparedness and capacity creation for the respective specific field areas as per the guidelines of State government and GSDMA.

In Vadodara district, DEOC / District Administration has developed linkages with other stakeholders such as Lending agencies, Government departments, Local authorities, NGOs, Private sector and Community groups to share the knowledge and augment capacity on a holistic basis. The capabilities developed in this phase play a critical role in all subsequent phases.

**In Pre-Disaster Phase with Respect to Vadodara District, the key activities** may be the joint efforts from the Chairman i.e. District Collector and other district line department heads / District Disaster Management Committee members towards the disaster management.

**Planned development:** There is a significant relationship in the way disasters and development affect each other. A long-term disaster management approach has been adopted and accordingly planning activities for development has been carried out for robust mitigation practices. District Administration and different Government Departments would ensure that the planning activities of the district administration and local authorities would take into account disaster risks and provide for suitable preventive and mitigation measures.

**Development of policies, SOP's and guidelines:** Effective disaster management requires the formulation of clear guidelines and subsequent compliance by all Government authorities, private sector entities and the public at large. Different departmental SOP's has been developed for Vadodara district and department specific and private sector specific SOP can be developed in these regard.

**Establishment of a proper chain of command:** It is imperative that a clear chain of command is established for effective management of activities that immediately follow a disaster. Vadodara DEOC / District has been established a clear chain of command which is headed by District Collector and DEOC is the focal control room for all disaster management activities and coordination mechanisms across all entities responsible for implementation in the district.

**Risk assessment:** Before commencing preventive and preparedness activities, it is important to identify and assess different types of risks for the district. Relevant departments will co-ordinate with District Administration for a thorough assessment of:

- Hazards: Classification of the region into zones, based on hazard potential; and
- Vulnerability: Assessment of degree of vulnerability of any given structure/ people / region to the impact of the hazard.

The assessment has been used for developing detailed contingency plans and mitigation measures.

**Develop disaster management plans:** Detailed disaster management plans that are tailored to local needs would enable the relevant authorities and the community to respond systematically and effectively to disasters. District administration / DEOC, different line departments, and expert agencies etc., in consultation with DEOC has developed the disaster management plans. These are constantly reviewed and updated.

**Develop repositories of information:** It is critical that the relevant authorities should be in a position to quickly establish contact with people and resources in the aftermath of a disaster. DEOC and the relevant Government departments has created comprehensive repository of information such as names, contact details, and made easily accessible to the relevant authorities at all times.

**Establish communication networks:** A robust district-wide communication network is critical not only for managing disasters but also for effective functioning of the district administration.

Comprehensive communication network has been established up to village level by DEOC and different line department

**Developing early warning mechanisms:** Early warning mechanisms help the relevant authorities in taking timely preventive measures and thereby, reduce the damage caused by disasters. Set up of early warning mechanisms by DEOC, different control rooms and departments to give advance warning for hazards like cyclones, floods etc.

**Building capabilities & expertise:** It is necessary to build strong capabilities and expertise for handling various aspects of disasters. District administration with the support of GSDMA has been involved in enhancing the capabilities of different officials and community members, NGO's etc by imparting disaster management trainings to different agencies and departments by providing rescue equipments for strengthening individual and department with respect to disaster management.

**During the period of any kind of disaster:** As per the set response mechanism with this District Disaster Management Plan all line department will perform accordingly to get the routine life back on the regular track, District Collector is the Responsible Officer and as per his/her directions all other line departments, agencies respond to the disaster and ensure that the damage due to the disaster can be minimize as much as possible. The Rescue and Relief work in the affected area will be the focal point of response and accordingly the response teams / groups will be performed to let the disturbed life on track.

**In Post disaster scenario** of any types of disaster, the focus will be on the rehabilitation and reconstruction work, as per the directions of State Government and so the Chairperson & District Collector, the aforesaid task will be performed with the support of different taskforce, department and agencies and by the cumulative efforts of all line department and response groups the focus will be on the routine life establishment.

Mitigation, preparedness and prevention actions are to be taken before a disaster to reduce the likelihood of a disaster (risk reduction) or the level of damage (vulnerability reduction) expected from a possible disaster. Vulnerability reduction is given priority over a risk reduction.

As Vadodara district is surrounded by various rivers and industrial zones the major possibilities of floods and industrial hazards are more with the district so the required mitigation strategies may

be developed in this regard to minimize the effect of such kind of disaster. Following flowchart shows the Disaster Management and Mitigation aspects in three different DM phases.

- “Mitigation” means a measure aimed at reducing the impact or effects of a disaster.
- “Prevention” means measures the object of which is to avoid the occurrence of a disaster
- “Reconstruction” means repair and construction of a property undertaken after a disaster
- “Rehabilitation” means any activity the objects of which is to restore normalcy in conditions caused by a disaster.
- “Emergency Preparedness” means the state of readiness which enables stakeholders to mobilize, organize and provide relief to deal with and impending or actual disaster or the effects of a disaster;

# **CHAPTER 6**

## **Capacity Building and Training Measures**

### **6.1 Approach**

#### **1. Holistic & Multi-Stakeholder Approach**

- The plan emphasizes coordination among:
- District Administration
- Municipal Corporation
- Government departments

- NGOs & private sector
- Community groups

## **2. Pre-Disaster Focused Approach**

- Capacity building is mainly part of the pre-disaster phase, which includes:
- Prevention
- Mitigation
- Preparedness
- Key training-related activities:
- Hazard, Risk & Vulnerability Analysis (HRVA)
- Resource database development
- Preparedness planning
- Awareness and training programs

## **3. Community-Based Approach**

- Local communities are actively involved in training programs
- Awareness campaigns and participation in drills

## **4. Institutional Capacity Building Approach**

- Strengthening capabilities of:
- Government officials
- Line departments
- Emergency responders
- Each department acts as a nodal agency for its sector (health, fire, police, etc.)

.

## **5. Training & Skill Development Approach**

- Includes:
- Mock drills and simulations
- Emergency response training
- Specialized programs (e.g., chemical safety, medical preparedness)

## **6. Participatory & Collaborative Approach**

- Public, NGOs, and private sector participate in:
- Training programs
- Workshops
- Awareness campaigns

### **7. Continuous Capacity Development Approach**

- Capacity building is not one-time:
- Regular training programs
- Refresher courses
- Workshops
- Supported by institutions like

Gujarat Institute of Disaster Management which use modern methods like virtual classrooms and blended learning.

### **8. Integrated & Multi-Hazard Approach**

- Training covers all types of disasters:
- Natural (floods, earthquakes)
- Man-made (industrial, chemical accidents)

### **9. Coordination & Network-Based Approach**

- Strong linkages between:
- Government agencies
- Financial institutions
- NGOs and community groups

### **10. Goal-Oriented Approach**

- The ultimate aim is:
- Faster response during disasters
- Reduced loss of life and property
- Creation of a disaster-resilient society

## **6.2 Capacity Building plan**

Improve knowledge and technical skills

Strengthen emergency response systems

Increase community awareness

Reduce disaster risks and losses

Build self-reliance and resilience

### **1. Human Resource Development**

Training of officials, volunteers, police, health staff

Skill development in rescue, first aid, evacuation

### **2. Institutional Development**

Strengthening departments and coordination systems

Setting up Emergency Operation Centres (EOC)

### **3. Infrastructure & Resource Development**

Availability of equipment (boats, ambulances, rescue tools)

Communication systems and warning systems

### **4. Community Participation**

Awareness programs

Mock drills in schools, villages, and urban areas

## **CHAPTER 7**

# **Resource and Relief Measures**

## **7.1 RESPONSE PLANNING**

The disaster response structure will be activated, on the receipt of disaster warning or on the occurrence of the disaster, with approval from the competent authority. The occurrence of disaster may be reported by the concerned monitoring authority to the Commissioner of Relief / SDMA by the fastest means. The Commissioner of Relief (CoR) will activate all departments for emergency response including the State EOC, District EOC and ERCs. Also, they will issue instructions to include the following details:

Exact quantum of resources (in terms of manpower, equipment and essential items from key departments/stakeholders) that is required.

- The type of assistance to be provided
- The time limit within which assistance is needed
- Details of other Task/Response Forces through which coordination should take place

The State EOC and other control rooms at the State level as well as district control rooms should be activated with full strength. The State Government may publish a notification in the official gazette declaring such areas to be disaster-affected area under applicable Act / Rule etc. Once the situation is totally controlled and normalcy is restored, the Commissioner of Relief declares end of Emergency Response and issues instructions to withdraw the staff deployed in emergency duties.

## **1. Purpose in Response Planning**

Quick assessment is the first step after disaster impact to:

Identify severity of damage

Determine priority areas

Enable rapid deployment of response teams

Support decision-making at District Emergency Operation Centre (DEOC)

## **2. Multi-Hazard Context (Vadodara)**

Vadodara faces multiple hazards:

Floods (Vishwamitri River overflow)

Industrial/Chemical accidents (industrial estates)

Urban fires & building collapse

Earthquakes

### **3. Quick Assessment Framework (0–72 Hours)**

#### **A. Human Impact**

Deaths, injured, missing

Displaced population

Vulnerable groups (children, elderly, disabled)

#### **B. Infrastructure Damage**

Housing (fully/partially damaged)

Roads, bridges, transport

Electricity, water supply

Hospitals, schools

#### **C. Hazard-Specific Assessment**

Floods: Water level, submerged areas

Industrial: Chemical leakage, toxic exposure

Fire: Burnt structures, affected zones

Earthquake: Structural collapse, cracks

#### **D. Immediate Needs**

Food and drinking water

Temporary shelter

Medical aid and emergency health services

Sanitation and hygiene

Search & rescue support

#### **4. Role in Preparedness**

Preparedness ensures quick assessment is effective through:

Pre-designed assessment formats and checklists

Training of officials and volunteers

Mock drills and simulation exercises

Resource database and GIS mapping

#### **5. Link with Response Planning**

Based on quick assessment:

Rescue teams are deployed to worst-hit areas

Relief camps are established

Medical teams are mobilized

Essential supplies are distributed

High-risk zones

Vulnerable populations

Critical infrastructure restoration

#### **6. Assessment Process (Stages)**

##### **1. Rapid Assessment (0–72 hrs)**

Immediate situation overview

Quick decision-making

##### **2. Detailed Assessment**

Sector-wise damage analysis

Basis for rehabilitation planning

##### **3. Post-Disaster Evaluation**

Identify gaps in response

Improve future preparedness

### **7. Institutional Mechanism**

Led by District Administration under DDMA

Supported by:

Police, Fire, Health Departments

Municipal Corporation

NGOs and community volunteers

Coordinated through DEOC for real-time reporting

### **8. Key Priorities for Vadodara**

Flood-prone zones → evacuation & shelter

Industrial areas → chemical risk control

Urban poor/slums → urgent relief support

Critical services → quick restoration

 Integrated Flow

Preparedness → Quick Assessment → Response Planning → Relief Measures → Detailed Assessment → Improvement

## **CHAPTER 8**

# **Reconstruction, Rehabilitation and Recovery Measures**

## **8.1 General Policy Guidelines**

Under the Disaster Management Act, 2005, reconstruction and rehabilitation (R&R) are key parts of disaster recovery, and the Act provides a broad framework rather than very detailed step-by-step rules. The actual guidelines are issued through national and state authorities based on this law.

### **1. Legal Basis in the Act**

The Act assigns responsibility for R&R mainly to:

National Disaster Management Authority (NDMA)

State Disaster Management Authority (SDMA)

District authorities

Relevant sections:

Section 6 & 10: NDMA and National Executive Committee frame policies and plans for recovery and reconstruction.

Section 18: SDMA ensures rehabilitation and reconstruction at the state level.

Section 24 & 34: District authorities implement relief, rehabilitation, and reconstruction measures.

### **2. Core Guidelines for Reconstruction & Rehabilitation**

Based on the Act and NDMA guidelines, the principles generally include:

#### **a) Build Back Better (BBB)**

Reconstruction should improve resilience, not just restore old conditions.

Use disaster-resistant designs and safer locations.

#### **b) Community-Centered Rehabilitation**

Involve affected communities in planning and implementation.

Ensure transparency and participation.

#### **c) Housing Reconstruction**

Provide financial/technical support for rebuilding homes.

Promote safe construction practices and compliance with building codes.

d) Livelihood Restoration

Restore employment, agriculture, small businesses, and local economies.

Provide skill training and financial assistance.

e) Infrastructure Restoration

Rebuild roads, schools, hospitals, water supply, and power systems.

Prioritize critical infrastructure.

f) Social Rehabilitation

Address needs of vulnerable groups (women, children, elderly, disabled).

Provide psychosocial support and healthcare.

g) Environmental Considerations

Avoid rebuilding in high-risk zones (flood plains, landslide areas).

Promote sustainable land use.

h) Coordination & Funding

Use funds like:

National Disaster Response Fund (NDRF)

State Disaster Response Fund (SDRF)

Ensure coordination between central, state, and local bodies.

### **3. Key Supporting Guidelines/Documents**

The detailed operational guidelines are issued by:

National Institute of Disaster Management

NDMA's sector-specific guidelines (housing, floods, earthquakes, etc.)

### **4. Overall Approach**

The Act promotes a holistic recovery cycle:

Relief → Immediate assistance

Rehabilitation → Short-term restoration

Reconstruction → Long-term rebuilding with resilience

Role of District Collector (DC) in Coordination

The District Collector (Chairperson/Co-chair of DDMA) plays a command role.

a) When should DC announce support requirements?

The DC should formally declare needs:

Immediately after initial damage assessment

Based on rapid assessment reports

Within first 24–48 hours

When local resources are insufficient

Request state/national assistance

During transition phases

Relief → Rehabilitation

Rehabilitation → Reconstruction

b) What kind of support should be announced?

The DC identifies and communicates:

### **1. Human Resources**

Medical teams

Engineers, rescue teams

Skilled workers

### **2. Material Resources**

Food, water, medicines

Shelter materials (tents, tarpaulins)

Machinery (JCBs, cranes)

### **3. Financial Assistance**

Emergency funds

Compensation for victims

Livelihood grants

### **4. Technical Support**

Damage assessment experts

Structural engineers

GIS/mapping support

### **5. Specialized Agencies**

Armed forces / NDRF teams

NGOs and international agencies

c) How is coordination done?

Through Emergency Operations Centre (EOC)

Daily review meetings chaired by DC

Clear division of responsibilities

Use of Incident Response System (IRS)

### **4. Timing of Relief vs Recovery Coordination**

| Phase                | Coordination Focus | Lead Authority |
|----------------------|--------------------|----------------|
| Immediate (0–3 days) | Rescue & relief    | DC / DDMA      |

| Phase                     | Coordination Focus | Lead Authority          |
|---------------------------|--------------------|-------------------------|
| Short-term (3 days–weeks) | Shelter, services  | DDMA + line departments |
| Long-term (weeks–years)   | Reconstruction     | State + DDMA            |

## **Restoration**

Disaster recovery is viewed by some people as a fight against nature to restore order in a community. However, the disaster recovery process is not a set of orderly actions triggered by the impact of a disaster upon a community. Rather, disaster recovery is a set of loosely related activities that occur before, during and after a disastrous event. These activities can include:

- Warning and Public Information
- Evacuation and Shelter
- Search and Rescue
- Damage Assessment
- Debris Clearance, Removal and Disposal
- Utilities and Communications Restoration
- Re-establishment of major transport linkages
- Temporary housing
- Financial management
- Economic impact analysis
- Detailed building inspections
- Re-development planning
- Environmental Impact Assessment
- Demolition
- Reconstruction
- Hazard mitigation; and
- Preparation for the next disaster.

Recovery has two phases i.e. Short term and Long term Recovery. Class I officers from various line departments are deputed as Liaison Officers for each Taluka, and they are responsible for monitoring and working with the local administration in both phases of recovery operations under the guidance of the District Collector.

Search and Rescue, Damage Assessment, Public Information, Temporary Housing, Utility Restoration and Debris Clearance are essential elements of short-term recovery. The efficacy of their implementation affects long-term decisions.

Long-term recovery begins when a community starts to repair or replace roads, bridges, homes, and stores. It is also the period where improvement and changes are for the betterment of the society such as strengthening building codes, changing land use and zoning designations, improving transportation corridors and replacing “affordable housing” stock, etc. Whether they are considered during pre-disaster planning or short-term post-disaster recovery, it is during the long-term recovery period that most changes in pre-existing conditions can and do occur. Changes that include sustained efforts to reduce loss of life and property from the next disaster, such as changes to building codes and land use designations are examples of mitigation.

### **Immediate and Short-Term Recovery**

While a preliminary damage assessment is carried out during disaster phase, a detailed assessment must be conducted before commencing reconstruction and rehabilitation activities. The relevant Government departments and local authorities shall initiate detailed assessment at their respective level for damages sustained in housing, industry/services, and infrastructure, agriculture, health / education assets in the affected regions. Immediate recovery can continue from a day to two months, depending upon the extent of damage.

#### **Restoration of Basic Infrastructure**

The restoration of basic infrastructure is to put the most essential infrastructure back in place after the disaster.

##### **a) Roads and Bridges**

This covers construction of all critical roads and bridges necessary to provide connectivity with immediate effect. It can be National Highway or village roads to link with main roads and health

centers, or construction/restoration of bridges that can be the only point of accessing Talukas & villages. Responsible Department: R & B (State & Panchayat)

**b) Drinking Water Supply**

Restoration of Drinking Water supply has to be done by setting up of new hand pumps, tube wells or setting up of piped water supply in areas with no access to potable water. In case of floods, setting up of raised hand pumps is required.

Responsible Department: Electricity Department & Water supply Department

**c) Electricity:** Restoration of power supply is also critical to immediate recovery. Responsible Department: Electricity Department

**d) Communication Network:** In times of disasters, communication networks may be disrupted. The networks of mobile services providers have to be put back in operation at the earliest to make search and rescue easier, as well as to expedite coordinated response measures.

Responsible Department: BSNL & Mobile Service Provider, Electricity Department

**e) Reconstruction & Repair of Lifeline Buildings**

Lifeline buildings are those necessary to keep the administrative machinery functioning despite the damage by disaster. The following buildings have to be repaired on priority:

- Collectorate
- Line Department Buildings
- Block Offices
- Hospitals

**f) Rehabilitation**

In case there is a major damage from earthquake or flooding, a large segment of the population may have to be rehabilitated to new locations on a temporary basis. There may be a need of permanent relocation in case of the change of river course. Communities will have to be supported with relief shelter.

**g) Mass Care/Sheltering and Housing**

The management of relief shelters is continued from the response phase to the immediate recovery phase and done through Incident Response System. The Incident Commander oversees the operations while the Relief Camp Manager manages the shelter. During this period, the

number of victims must be identified for whom construction of houses under Indira Aawas Yojna & Sardar Awas Yojna shall be sanctioned.

#### **h) Food**

Supply of food in relief phase is more important. It becomes important to elicit support from various NGOs, Grain merchants and volunteers.

#### **i) Debris Removal and Disposal of Dead Bodies**

We should remove debris or trees from transportation routes for effective rescue and relief measures. Dead bodies of humans and animals may be found in the debris and hence the Health & Animal Husbandry Department works in tandem with debris removal agencies.

#### **j) Drainage and Sewage**

Drainage and sewage systems will have to be quickly re-established to decrease inundation from floods, spread of diseases and epidemics and maintaining hygiene.

#### **k) Health Care**

First Aid and Emergency Health care has to be provided at the earliest. In case the health care centers are affected by the disaster, temporary medical relief camps need to be installed while the building is retrofitted or reconstructed. Reconstruction of buildings has to begin in this phase. Mobile Medical Units (MMUs) have to be pushed into action for immediately health care close to the community.

#### **l) Livelihood Recovery**

Livelihood interventions will happen over to three different overlapping phases, i.e. Livelihood Provisioning, Livelihood Protection and Livelihood Promotion. The first two phases shall form part of the Immediate & Short Term recovery, while the third shall form a part of Long Term Recovery.

**1. Livelihood Provisioning:** Providing critical food and non-food items in the form of relief is necessary for survival. This will focus on disbursement of food and health services for chronically vulnerable people during the emergency.

2. **Livelihood Protection:** Protect, replace and rebuild the productive assets needed to sustain a preexisting or new livelihood.

i) **Cash doles:** Some amount of cash assistance should be given for self-directed delivery by the victims. Individual loans and community block grants shall be extended to build local earning assets. ii) **Material Assistance:** In case where replacement of crucial assets or fresh requirement of some resources is crucial and not easily available in local markets, material assistance shall be provided. For instance, distribution of seeds to farmers can be done.

### **Mitigation Activities**

As a part of conducting a detailed damage and loss assessment, an assessment of prospective risks and vulnerabilities will also have to be done. For example, refurbishing of embankments or retrofitting of houses and other buildings.

### **Long Term Recovery**

Long-term recovery must be complete in 2 months to 24 months time. (i) Housing Development of permanent housing solution for victims will happen during this period. (ii) The construction of houses for victims identified under Indira Awas Yojana and Sardar Awas Yojna shall be undertaken during this time.

### **Reconstruction and Repair**

#### **a) Infrastructure**

Restoration of social infrastructure has to be done to reinstate the normal functioning of district infrastructure. Schools & Hospitals will have to be reconstructed and repaired in this recovery phase.

Re-establishment of disrupted health care services will have to be done at the earliest.

Responsible Department for Hospitals: Health Department & R & B

Responsible Department for Schools: Education Department & R & B

### b) Economic Infrastructure

Restoration of economic infrastructure (Banks) is essential for accessibility of money and the smooth functioning of the economy of the district. Unless addressed, it severely affects the livelihood and employment potential of the district. Thus, bank buildings shall be quickly instated.

### c) Livelihood Recovery

Final phase for livelihood recovery is a part of long-term recovery initiatives.

i) Livelihood Promotion: To initiate and strengthen livelihoods to be more economically and environmentally sustainable as well as more resilient to future disasters.

In this long term recovery effort, focus is on livelihoods diversification, creation of alternate income generating activities, providing financial services such as loans and insurance, and strengthening forward linkages with markets for existing and new livelihoods.

ii) Microfinance Services: Micro-credit (small loans) shall be provided to repair or replace critical livelihood assets, finance existing debts or for developing new livelihoods.

iii) Micro-insurance: Providing small-scale insurance at low premium for providing payouts on the occasions of emergencies. Insurance of livestock shall also be facilitated.

## **Restoration of Essential Services and Infrastructure**

The following tables are to be filled after an event of disaster:

### **Power**

| Item/Services  | No. of unit damaged | No of villages affected | Population affected | Recovery measures | Implementing agency | Tentative Duration (Months) |
|----------------|---------------------|-------------------------|---------------------|-------------------|---------------------|-----------------------------|
| Feeder         |                     |                         |                     |                   |                     |                             |
| Transformers   |                     |                         |                     |                   |                     |                             |
| HT Lines       |                     |                         |                     |                   |                     |                             |
| LT Lines       |                     |                         |                     |                   |                     |                             |
| Electric Poles |                     |                         |                     |                   |                     |                             |

To be planned after initial damage assessment by departments

### Health

|                                                     | PHC (village name) | CHC | Sub Centre | Drug Store | Recovery Measures | Implementing agency | Tentative Duration (Months) |
|-----------------------------------------------------|--------------------|-----|------------|------------|-------------------|---------------------|-----------------------------|
| No of buildings damaged                             |                    |     |            |            |                   |                     |                             |
| No of health centres inaccessible                   |                    |     |            |            |                   |                     |                             |
| Refrigeration and other vital equipment for storage |                    |     |            |            |                   |                     |                             |
| Drugs and medicines perished                        | (Location and qty) |     |            |            |                   |                     |                             |
| No of Ambulance damaged                             |                    |     |            |            |                   |                     |                             |

To be planned after initial damage assessment by departments

### Social

People in need of immediate rehabilitation including psychosocial support (due to disaster)

| Village | Men | Women | Children | Total | Recovery Measures | Implementing agency | Tentative Duration (Months) |
|---------|-----|-------|----------|-------|-------------------|---------------------|-----------------------------|
|         |     |       |          |       |                   |                     |                             |
|         |     |       |          |       |                   |                     |                             |

### Water Supply

| Type                   | Village | No. of unit affected | Faliya/ Population affected | Recovery Measures | Implementing agency | Tentative Duration (Months) |
|------------------------|---------|----------------------|-----------------------------|-------------------|---------------------|-----------------------------|
| Well                   |         |                      |                             |                   |                     |                             |
| Borewells              |         |                      |                             |                   |                     |                             |
| Pond                   |         |                      |                             |                   |                     |                             |
| Water Supply Disrupted |         |                      |                             |                   |                     |                             |
| Contamination          |         |                      |                             |                   |                     |                             |
| ESR damaged            |         |                      |                             |                   |                     |                             |
| GLR Damaged            |         |                      |                             |                   |                     |                             |
| Sump damaged           |         |                      |                             |                   |                     |                             |
| Pipelines damaged      |         |                      |                             |                   |                     |                             |

# **CHAPTER 9**

## **Financial Resources for Implementation of DDMP**

### **9.1 Financial Arrangements**

#### **Financial Resources for Implementation of DDMP**

This chapter explains how funds are **mobilized, allocated, and utilized** at district level for disaster preparedness, response, recovery, and reconstruction. It also includes references to relevant Government Orders (GOs).

## **1. State Level Financial Resources**

### **a) State Budget / Plan Funds**

Regular allocations under state annual budget

Used for:

Preparedness activities

Capacity building

Infrastructure strengthening

### **b) State Disaster Mitigation Fund (SDMF)**

Focus: pre-disaster risk reduction

Used for:

Flood control, embankments

Earthquake-resistant structures

Early warning systems

### **c) State Disaster Response Fund (SDRF)**

Main fund for immediate disaster response

Used for:

Relief (food, shelter, medical aid)

Evacuation and rescue

Compensation to victims

## **2. District Level Financial Resources**

### **a) District Planning Fund**

Allocated under district development plans

Can be diverted for mitigation and preparedness

Supports:

Local infrastructure strengthening

Community-level disaster risk reduction

### **b) District Disaster Response Fund / Emergency Fund**

Managed by the District Disaster Management Authority

Special provision:

District Collector (DC) has pre-authorization to draw funds from treasury in emergencies

Immediate relief operations

Temporary shelters

Urgent logistics

### **3. Disaster Risk Insurance**

Financial risk transfer mechanism

Covers:

Property damage

Crop loss (e.g., crop insurance schemes)

Livelihood assets

Importance:

Reduces burden on government funds

Ensures quicker recovery for affected people

### **4. Other Financing Options**

a) Government Schemes Convergence

Use of schemes like:

Housing programs

Rural employment schemes

Reconstruction

Livelihood restoration

b) External Assistance

NGOs and international agencies

Corporate Social Responsibility (CSR) funds from companies

c) Loans and Financial Institutions

Soft loans for:

Infrastructure rebuilding

Small businesses recovery

d) Public-Private Partnerships (PPP)

Used for rebuilding:

Roads

Hospitals

Utilities

### **5. Key Administrative Aspects**

Proper budgeting and auditing required

Transparency and accountability must be ensured

All Government Orders (GOs) related to fund use should be referenced

Important GOs should be attached in Annexure of DDMP

### **6. Important Exam Line**

☞ “Financial resource planning under DDMP ensures timely availability, flexibility, and convergence of funds for effective disaster response, recovery, and mitigation

# **CHAPTER 10**

## **Procedure and Methodology for Monitoring, Evaluation and Updation and maintenance of DDMP**

The District Disaster Management Authority is responsible for ensuring that the District Disaster Management Plan (DDMP) remains functional, relevant, and up to date.

### **1. Monitoring of DDMP**

Purpose:

To ensure that disaster preparedness, mitigation, and response activities are being properly implemented.

Methodology:

Regular Review Meetings

Chaired by District Collector (DC)

Involves line departments (health, police, PWD, etc.)

Progress Tracking

Monitor implementation of:

Mitigation projects

Capacity building programs

Resource inventory updates

Field Inspections

Verification of:

Shelters

Equipment

Early warning systems

Emergency Operations Centre (EOC) Monitoring

Continuous monitoring during disasters

## **2. Evaluation of DDMP**

Purpose:

To assess effectiveness and gaps in the plan.

Methodology:

a) Post-Disaster Evaluation

Conduct After Action Review (AAR)

Identify:

Strengths

Weaknesses

Lessons learned

b) Mock Drills & Simulations

Regular drills at district and community level

Evaluate:

Response time

Coordination efficiency

Resource adequacy

c) Performance Indicators

Response time

Relief distribution efficiency

Restoration time of essential services

### **3. Updation of DDMP**

Frequency:

At least once every year

Also after:

Major disasters

Policy changes

Administrative changes

Process:

Update:

Hazard risk assessments

Resource inventory (manpower, equipment)

Contact details of officials/agencies

Incorporate:

New technologies

Revised government guidelines

Align with guidelines of National Disaster Management Authority

### **4. Maintenance of DDMP**

Key Activities:

a) Documentation

Maintain updated records:

Maps

SOPs

Resource databases

b) Digital & Physical Copies

Keep:

Soft copies (EOC systems)

Hard copies at key offices

c) Accessibility

Ensure plan is available to:

All departments

Emergency responders

Local authorities

d) Capacity Building

Regular training programs

Awareness campaigns for stakeholders

## **5. Institutional Mechanism**

DDMA → Overall responsibility

District Collector (DC) → (lead role)

Line Departments → Implementation & reporting

Local Bodies → Ground-level execution

## **6. Key Principles**

Continuous process (not one-time activity)

Participatory approach (multi-stakeholder involvement)

Flexibility and adaptability

Transparency and accountability

## **7. Important Exam Line**

☞ “DDMP is a dynamic document that requires continuous monitoring, periodic evaluation, and regular updating to ensure effective disaster preparedness and response.”

# **CHAPTER 11**

## **Co-Ordination Mechanism for Implementation of DDMP**

### **11.1 Intra and inter-Department coordination with horizontal linkages**

(Comprehensive – Intra, Inter, Horizontal & Vertical Linkages)

The District Disaster Management Authority ensures a multi-layered coordination system integrating government, non-government, and community institutions for effective disaster management.

## **1. Intra- and Inter-Department Coordination with Horizontal Linkages**

### **Intra-Department:**

Coordination within a department (district → block → field units)

Ensured through SOPs, reporting systems, and control rooms

### **Inter-Department:**

Coordination among departments like Health, Police, PWD, Irrigation, Power

### **Mechanisms:**

DDMA meetings

Emergency Operations Centre (EOC)

Incident Response System (IRS)

### **Horizontal Linkages:**

Departments at the same administrative level (district) coordinate for:

Resource sharing

Joint operations

Information exchange

## **2. Coordination with NGOs, CBOs, SHGs, Industries, Private Schools & Hospitals**

### **Stakeholders:**

NGOs & Community-Based Organizations (CBOs)

Self Help Groups (SHGs)

Industries & private sector

Private schools and hospitals

### **Mechanism:**

Pre-registration and database creation

### **Defined roles in DDMP:**

NGOs → relief distribution

SHGs → community mobilization

Industries → logistics/CSR support

Private hospitals → emergency healthcare

Schools → shelters

### **Linkages:**

Horizontal: With district administration

Vertical: Connected to state/national agencies when required

### **3. Coordination with Block/Village Task Forces**

Vertical Linkages:

District → Block → Village task forces

Functions:

Early warning dissemination

Evacuation and rescue

First response at local level

Horizontal Linkages:

Coordination between:

Different blocks

Neighbouring villages

Resource sharing

Mutual support during disasters

### **4. Coordination with State Departments & Training Institutes**

Agencies:

State line departments

Training institutes like National Institute of Disaster Management

Mechanism:

Technical guidance

Capacity building programs

Policy alignment with state plans

### **5. Intra-Block and Intra-Village Coordination**

Intra-Block:

Coordination among:

Block offices

Line department staff

Block-level task forces

Intra-Village:

Coordination among:

Village committees

SHGs

Community volunteers

Community-based disaster management

Immediate local response

## **6. Coordination with Local Self-Government Institutions**

Institutions:

Panchayati Raj Institutions:

Zila Parishad

Intermediate level (Block Panchayat)

Gram Panchayat

Urban Local Bodies (ULBs)

Legal Provision:

As per Section 41 of the Act, local authorities function under DDMA guidance

Mechanism:

Integration into DDMP planning

Regular coordination meetings

Defined roles in:

Relief distribution

Shelter management

Awareness programs

## **7. Linkage with DDMPs of Neighboring Districts**

Purpose:

Address cross-boundary disasters (floods, earthquakes, cyclones)

Mechanism:

Information sharing

Joint mock drills

Mutual aid agreements

Seamless response across district borders

### **8. Linkage with SDMP (State Disaster Management Plan)**

DDMP must align with State Plan prepared by State Disaster Management Authority

Mechanism:

Policy alignment

Resource support from state

Reporting and feedback system

### **9. Key Features of Effective Coordination System**

Clear chain of command (DC as nodal authority)

Integration of vertical and horizontal linkages

Multi-stakeholder participation

Real-time communication systems

Flexibility and adaptability

### **10. Key Exam Line**

An effective DDMP coordination mechanism integrates intra- and inter-departmental systems with horizontal and vertical linkages across government, community, and private stakeholders for a unified disaster response.”

# **CHAPTER 12**

## **Standard Operating Procedures**

### **12.1 Standard Operating Procedure**

#### **1. Concept of SOPs in DDMP**

Standard Operating Procedures (SOPs) are predefined, step-by-step instructions for stakeholders to ensure a quick, coordinated, and effective disaster response.

Prepared based on:

Emergency Support Functions (ESFs)

Incident Response System (IRS)

Developed by the District Disaster Management Authority in a participatory manner

SOPs vary depending on:

Hazard profile (flood, earthquake, cyclone, etc.)

Risk exposure of the district

## **2. Core Components of SOPs**

### **a) Definition of Disaster Situations**

Clearly define:

Types of disasters

Severity levels (minor, moderate, major)

Helps in triggering appropriate response levels

### **b) Action on Receipt of Warning**

Steps to be followed when early warning is received:

Activation of Emergency Operations Centre (EOC)

Alerting departments and stakeholders

Dissemination to public via:

SMS, sirens, media

### **c) Warning Dissemination**

Multi-channel communication:

Police, local bodies, volunteers

Ensure last-mile connectivity (village level)

### **d) Access to Financial & Technical Resources**

Procedures to:

Mobilize funds (district/state funds)

Request technical experts (engineers, medical teams)

### **e) Roles and Responsibilities**

Clearly define duties of:

Government departments

NGOs and private sector

Community groups

### **f) Information Management & Dissemination**

Real-time data collection and reporting

Use of:

Control rooms

Digital platforms

g) Media Management Strategy

Designate official spokesperson

Provide:

Accurate and timely information

Avoid rumours and panic

h) Request for State Government Assistance

Procedure for escalation:

When district resources are insufficient

Formal communication to state authorities

i) Relief & Rehabilitation Norms

Follow standard government norms for:

Compensation

Relief distribution

Assistance packages

### **3. Emergency Response / Support Functions (ESFs)**

SOPs must define actions for:

Evacuation

Search and Rescue

Area cordoning

Traffic control

Law and order

Dead body disposal

Carcass disposal

(Other hazard-specific functions can be added)

### **4. Humanitarian Relief & Assistance**

SOPs should ensure provision of:

Basic Needs:

Food

Drinking water

Medicines

Clothing

Health & Care:

Trauma care

Medical assistance

Shelter & Support:

Shelter management

Helplines for affected people

Infrastructure Restoration:

Repair of:

Water supply

Electricity

Transport systems

Administrative Support:

Management of VIP visits

Maintenance of emergency reserves

Including private sector support

## **5. Checklist Approach in SOP**

Each SOP should include checklists for:

Pre-disaster preparedness

During disaster response

Post-disaster recovery

No critical step is missed

Standardization of response

## **6. Key Features of Effective SOPs**

Simple and clear instructions

Role-specific responsibilities

Time-bound actions

Flexibility for different disaster scenarios

## Regular updates and mock testing

The Present plan document identifies the roles and Responsibilities of the organization, in key identified sector. Taskforces have constituted for taking response measures in sectors. Action plan has been prepared for each taskforce which covers their roles & responsibilities in development of incident / emergency. It is expected that each taskforce shall develop the standard operating procedures for specific disaster / emergency. District collector has to ensure that all the members acquire knowledge and skills to perform their assigned roles.

### **DISTRICT MAGISTRATE & COLLECTOR**

Being chairperson and Incident commander of the district for Disaster Management, he will be in overall command & emergency action to control a kind of emergency effectively for the district.

The Chairperson must perform the role as follows:

- Preparation and updating of District Disaster Management Plan for the District.
- To ensure that everyone can perform the role involved in emergency service effectively.
- To activate and maintain the District Control Room round the clock. To provide essential facilities with the District control room.
- To access emergency and must declare the emergency, call and direct the emergency services to respond the emergency by providing reinforcement and support by pooling the resources form the District and if required from the State.
- The arrangement for rescue, evacuation, shelter, food, water, clothing, and transportation to affected area, announcement to the public.
- To keep inform to the higher authority time to time to declare the withdrawal or termination of emergency.
- Rehabilitation, Restoration, Cleaning, etc. on post emergency actions.
- To submit the reports on emergency. To conduct the meetings.
- To conduct the mock drill.

### **MUNICIPAL COMMISSIONER**

On receiving the information from the Collector, the Vadodara Municipal Corporation will help by planning like:

- To receive casualties during an emergency in the corporation run Hospitals.
- To mobilize the firefighting equipment's for Civil Hospital.
- To check for expected effected effects to the citizens of Vadodara and to take actions accordingly.
- To make schools available for shelters.
- To blow the city sirens for alarming the public.
- To inform the concerned department heads such as water and sewage supply, electricity section, hospitals, education department etc. about their DCPC plans and their functions and preparedness during emergencies.
- To rehabilitate evacuated city population after the emergency.

#### **DISTRICT DEVELOPMENT OFFICER**

Being a responsible person of Taluka / District the following actions are to be given prime importance for emergency purpose.

- To ensure the different authorities, agencies, organization persons, as specified their role, should participate immediately during emergency in district pocket area.
- To advice and guide different panchayat department and local representatives for mitigate and preventives aspects of disaster management and coordinative approach at the time of emergency.
- To participate in the meeting, mock drill & training.
- To prepare own detailed action plan to ensure effective control on emergency.
- To liaison & co-ordination with chair person, Central Control Room, emergency services, organization, agencies, agencies person etc.
- To support all other duties as specified by District Collector.

#### **POLICE DEPARTMENT**

Another authority who gets the first information on incident / accident is police department. The following actions are to be carried out by police department.

- To access the situation and report immediately.

- To maintain the law and order during the emergency to control the traffic and control the affected area.
- To protect the life of people, inside, outside as well as road movers.
- To protect the property & environment & public announcement.
- Evacuation, rehabilitation, shelter & transportation work during the emergency as per prevailing situation.
- To help & assist to make area clean, removing of any structure and other similar work as required during actual emergency.
- To participate the meetings & Mock Drill / Rehearsal & Training.
- To liaison with Central Control Room and other emergency services / organization / agencies.
- To prepare their own details action plan & to ensure the provisions to handle the emergency.

### **FIRE SERVICES**

Most probably, the first information regarding any incidence / event is received by the fire services. Thus, fire service being first informant has to play the major role during the emergency.

- Inspection, survey & assess the situation where incident occur & give the report.
- To decide the proper & effective actions and immediate response actions to control the emergency, under intimation to Central Control Room or Chair Person.
- Proper training to fight against different hazards
- Rescue, Evacuation, Remove of debris, and other emergency work as directed or instructed.
- To maintain the proper and adequate firefighting, equipments, neutralizing media, self-breathing apparatus, emergency equipments, personnel protective equipments with keeping in working order.
- The knowledge & information on different type of alternative resources, various types of extinguishing media, neutralizing media, chemical properties and their hazards with safe handling procedure.
- To participate the meetings Mock Drill / Rehearsal & training.
- To liaison with Central Control Room and other emergency services.
- To prepare their own details action plan & to ensure the provisions to handle the emergency.

- Other duties as required during actual emergency.

### **HEALTH DEPARTMENT**

The health and medical services have to play vital role following the emergency. One fold is proper & timely treatments to the victims injured or affected persons. Other fold is to safe guard the public health.

- To ensure the arrangement & preparedness for special medical treatment antidotes and trained doctor Para-medical staff as specified in toxicology at the time of industrial emergency in local pocket area.
- On declaration of emergency or on receiving the message or information, prompt medical facilities should be set up e.g. first aid post, casualty receiving center/ camp, as per gravity of situation at site. Similarly, arrangement for emergency operation or special treatment on chemical burn, injury, gas dispersion etc. with adequate arrangement, which will can serve the purpose of Base Hospital.
- Identification of dead bodies and post mortem arrangement.
- To maintain up to-date list with telephone nos. of services of doctors, hospitals,
- Ambulance, primary health center, Para-medical staff, vehicle to meet the emergency situation.
- Arrangement to inform the up to-date status time to time to DEOC, Chair Person, and Relatives of injured or admitted patients, emergency services etc.
- Arrangement to safe guard the public health in case of development of epidemic situation & announcement on safety measure to be taken by public at the time of emergency situation.
- To advice & guide the different stake holders in respect of medical & health part time to time.
- Provision for proper and adequate medicines, lifesaving drugs, equipments, antidotes etc. related to different hazards.
- To participate meetings, mock drills / examine and training.
- To prepare own detailed action plan to ensure the effective handling of different kinds of emergencies.
- To liaison with DEOC, Chairperson, emergency services organization, agency and other related person.

- Other duties as required during actual emergency.

### **RTO**

- To respond to collector and police instructions in different kinds of emergency
- To provide adequate requirements for both persons and material.
- To arrange for deployment of vehicles with full fuel levels.
- To streamline traffic flow and parking yard movement.
- To co-ordinate in deployment of vehicles, if required.
- To participated meeting, mock drills & training.
- To prepare own detailed action plan to ensure effective handing at the time of actual emergency.

### **Civil Supplies Department**

- To arrange to provide cooked food and clothing to evacuees and others involved in emergency controlling operation.
- To ensure availability of sufficient cooked food, water ready for distributaries at various locations.
- To participate in the meeting, mock drills & training.
- To prepare own detailed action plan to ensure effective handling of emergency.

### **Joint Director - Information**

The proper and correct news should be reach to the public to avoid rumours and panicky. The role of District information officer is to create awareness and preparedness amongst the public for different hazards because of wide & fast spreading news.

- To participate in the meeting, mock drill / exercises and training.
- To assist the public in case of rescue operation and authentic news.
- To liaison & Co-ordination with Chair person, Central Control Room and emergency services.

- Ensure to safe guard the public at large during actual emergency by providing correct reliable authentic guideline and news.

#### **Dy. Controller (Civil Defence)**

- To participate in meeting, mock drills & training.
- To prepare own detailed action plan to ensure effective handling of emergency
- To assist police in rescue and evacuation work during emergency.
- To provide security, cordoning the area, and other Services.

#### **ELECTRICITY BOARD (MGVCL)**

- To arrange for un-interrupted power supply, if needed.
- To arrange for lighting at temporary medical camps, rallying points and parking yards.
- To take care of electrical equipment within affected zone.
- Arrange for switching off power supply if requested by authority.
- To participate in the meeting, mock drills & training
- To prepare own detailed action plan to ensure effective handling of emergency

#### **Regional Officer (GPCB)**

- To participate in the meetings, mock drill / exercises and training.
- To prepare own detailed action plan to ensure the effective control of industrial emergency & subsequent action.
- Liaison with central control Room, chairperson, Emergency Services, Organization agencies & other related persons.
- Advice & Guidance to the District Crisis Group in Respect of environment protection in the industrial pocket.
- To provide the technical input regarding environment and evaluate the contamination or adverse effect during industrial emergency.

- To provide the details & information on development of emergency regarding in safe level to the life and suggest area to be evacuated and other safety measures.
- To suggest the safe level for restoration & restarting of work on termination of emergency services & expert persons etc.
- Other duties or work as directed by District crisis group or chairperson.

### **B) Representative Form MAH Units**

The management of major accident hazardous unit has to maintain updated onsite emergency plan with necessary details with accurate information and a correct assessment of the situation. The site main controller is responsible to provide immediately on occurrence of crisis at his unit with specific details, development and needed help from local crisis group & district crisis group. He will arrange & provide all the resources, equipments, manpower, and communication network from his own unit and co-ordinate with local crisis group & district crisis Group to combat the industrial emergency.

### **C) Role of other members of District Crisis Group**

The other members like controller of explosives, trade union representative, agriculture department, municipal commissioner and other government agencies, etc. have to perform the various duties. However, the following are the suggested duties as required during the emergency:

- To participate in the meeting, mock drill / exercise and training.
- To assist the public in proper way in case of rescue and evacuation during actual emergency.
- To advice and guidance to the District crisis group & Chair person.
- To arrange and help the supporting actions and duties in respect of industrial emergency
- To provide more and adequate resources & various requirement to tackle the industrial emergency immediately.
- Liaison & co-ordination with Central Control Room and emergency services.

#### **D) Volunteer Organizations (N.G.O.)**

The voluntary organization / services can play vital role in relief & rescue operations like arrangement of food packets & packing up of the same, distribution of the food packets and water pouches, arrangements of life saving drugs & distribution of the same, can play a major role in awareness generation, to convince the person / public to evacuate the residence / place and to shift to safe shelter timely during emergency. Otherwise it may result more serious effect. To save the life of public is more important factor, which will be successfully carried out by the voluntary organization. The list of such organization with address, telephone no. organization etc. will be prepared and up-dated time to time.

#### **E) Railway Authority**

On getting information at the time of disaster from Central Control Room, the Divisional Manager, western Railway, Vadodara will take following actions:

- To issue the standing instruction to all railway gates to take actions on receiving the message from the Station Master.
- To decide authority level of railway staff to take actions.
- To carry out evacuation by railway, if required.
- To take care of floating population at railway stations and on board travelers.
- To issue the standing instruction to station Masters on up and down railway stations to stop the train as soon as emergency message is received from DEOC and CCR.

#### **F) Irrigation Department**

- Play vital role in pre, during and post form of emergencies particularly in floods.
- Proper management of dams, irrigation canals, ponds and timely maintenance of the same.
- Inform DEOC and respective stake holders in case of water release from the dams.
- Start their control room at the time of monsoon.
- Follow the instructions mentioned with the Flood memorandum.
- To participate in the meetings, mock drill / exercises and training.
- To prepare own detailed action plan to ensure the effective handling of different kinds of emergencies.

- Liaison with DEOC, Chairperson, emergency services organization, agency and other related person.
- Other duties as required during actual emergency.

**G) R&B Department**

- To play vital role in pre, during and post form of emergencies.
- Proper management of roads and buildings and timely maintenance of the same.
- Inform DEOC and respective stake holders' diversion of routes, closing status of the roads etc.
- Ensure safety terms while establishing or developing of bridges, dams, roads, buildings etc.
- To participate in the meetings, mock drill / exercises and training.
- To prepare own detailed action plan to ensure the effective handling of different kinds of emergencies.
- Liaison with DEOC, Chairperson, emergency services organization, agency and other related person.
- Other duties as required during actual emergency.

## 12.2 MEASURES BEFORE BORE WELL INCIDENT

### Do's

- The owner of the land/premises, before taking any steps for construction bore well/tube well must inform in writing at least 15 days in advance to the concerned authorities in the area.
- Registration of all the drilling agencies, viz., Govt./Semi Govt./Private etc. should be mandatory with the district administration or Statutory Authority wherever applicable.
- Erection of signboard at the time of construction near the well is mandatory. The following details should be included on the signboard:-(a) Complete address of the drilling agency at the time of construction/rehabilitation of well. (b) Complete address of the user agency/owner of the well.
- Erection of barbed wire fencing or any other suitable barrier around the well during construction.
- Construction of cement/concrete platform measuring 0.50x0.50x0.60 meter (0.30 meter above ground level and 0.30 meter below ground level) around the well casing.
- Capping of well assembly by welding steel plate or by providing a strong cap to be fixed to the casing pipe with bolts and nuts.
- In case of pump repair, the tube well should not be left uncovered.
- Filling of mud pits and channels after completion of works.
- Filling up abandoned bore wells by clay/sand/boulders/pebbles/drill cuttings etc. from bottom to ground level.
- On completion of the drilling operations at a particular location, the ground conditions are to be restored as before the start of drilling.
- District Collector should be empowered to verify that the above guidelines are being followed and proper monitoring check about the status of boreholes/tube wells are being taken care through the concerned State/Central Government agencies.
- District/Block/Village wise status of bore wells/tube wells drilled. In the rural areas monitoring of these should be done through village Sarpanch and the Executive from the Agriculture Department. In case of urban areas, the monitoring should be done through Junior Engineer and the Executive from the concerned Department of Ground Water or Public Health or Municipal Corporation.

- If a bore well/tube well is 'Abandoned' at any stage, a certificate from the concerned department of Ground Water/Public health/Municipal Corporation/Private contractor must be obtained by these agencies.
- Information on all such data on the above are to be maintained in the District Collector/Block Development Office of the State.

### **MEASURES AFTER BORE WELL INCIDENT**

- Secure the scene by cordoning the bore well to avoid any unwanted objects falling into the bore well and causing harm to the child and thus hamper the rescuing efforts.
- Cordon the affected area and control unnecessary movements/crowd gathering near the bore well.
- Try to stabilize the victim, if possible, with the help of rope.
- Make arrangements for supplying oxygen to the child with the help of pipe.
- Arrangement of sufficient lights in the area for the night operation.
- Immediately contact the nearby NDRF Unit.
- As per the direction of NDRF unit, start digging earth vertically and parallel to the depth of bore well at the sufficient distance from the bore well or as directed by the NDRF.
- Keep motivating the victim by regular talking of parents or relatives.
- District medical officer should be made aware about the compartment compression syndrome and action to be taken in such cases

### **Don'ts**

- Don't leave the tube well/bore well uncovered after repair/daily work done.
- Do not throw any food article or pour water in the Bore well.
- Do not allow underground water seepage in bore well.
- Do not allow heavy machines to work at full power to avoid heavy vibration which may result in loosening of surrounding soils and collapse of the bore well.
- Do not allow crowd to gather around the incident site.

## **GUIDELINES REGARDING BORE WELL SAFETY MEASURES BY SUPREME COURT:**

Safety measures/guidelines as given in the Order dated 11.02.2010 of Hon'ble Supreme

Court is to be observed by all the States: -

- The owner of the land/premises, before taking any steps for construction bore well/tube well must inform in writing at least 15 days in advance to the concerned authorities in the area, i.e., District Collector/District Magistrate/Sarpanch of the Gram Panchayat/ Concerned officers of the Department of Ground Water/ Public Health/Municipal Corporation, as the case may be, about the construction of bore well/tube well.
- Registration of all the drilling agencies, viz., Govt./Semi Govt./Private etc. should be mandatory with the district administration.
- Erection of signboard at the time of construction near the well with the following details:-  
(a) Complete address of the drilling agency at the time of construction/ rehabilitation of well. (b) Complete address of the user agency/owner of the well.
- Erection of barbed wire fencing or any other suitable barrier around the well during construction.
- Construction of cement/concrete platform measuring 0.50x0.50x0.60 meter (0.30 meter above ground level and 0.30 meter below ground level) around the well casing.
- Capping of well assembly by welding steel plate or by providing a strong cap to be fixed to the casing pipe with bolts and nuts.
- In case of pump repair, the tube well should not be left uncovered.
- Filling of mud pits and channels after completion of works.
- Filling up abandoned Bore wells by clay/sand/boulders/pebbles/drill cuttings etc. from bottom to ground level.
- On completion of the drilling operations at a particular location, the ground condition are to be restored as before the start of drilling.
- District Collector should be empowered to verify that the above guidelines are being followed and proper monitoring check about the status of boreholes/tube-wells are being taken care through the concerned State/Central Government agencies.

- District/Block/Village wise status of bore wells/tube-wells drilled viz. No. of wells in use, No. of abandoned bore wells/tube wells found open, No. of abandoned Bore wells/tube wells properly filled up to ground level and balance number of abandoned Bore wells/tube-wells to be filled up to ground level is to be maintained at District Level. In rural areas, the monitoring of the above is to be done through village Sarpanch and the Executive from the Agriculture Department.
- If a Bore well/tube-well is 'Abandoned' at any stage, a certificate from the concerned department of Ground Water/Public health/Municipal Corporation/Private contractor etc. must be obtained by the aforesaid agencies that the 'Abandoned' Bore well/tubewell is properly filled up to the ground level. Random inspection of the abandoned wells is also to be done by the Executive of the concern agency/department. Information on all such data on the above are to be maintained in the District Collector/Block Development Office of the State.

## ANNEXURES

### **History:**

Baroda has a rich historical background. The ardent historians can trace Baroda's history over 2000 years and more. However, the recent threads can be picked up when the Mughal rule over the city came to an end in 1732, when Pilaji brought the Maratha activities in Southern Gujarat to a head and captured it. Except for a short break, Baroda continued to be in the hands of the Gaekwads from 1734 to 1949.

The greatest period in the Maratha rule of Baroda started with the accession of Maharaja Sayajirao III in 1875. It was an era of great progress and constructive achievements in all fields.

Maharaja Sayajirao was one of the foremost administrators and reformers of his times. He initiated a series of bold socio-economic reforms. He attached great importance to economic development and started a few model industries to encourage initiative and then handed back the working industries to private enterprises. He started model textile and tile factories. It is because of his policy of industrial development that Baroda is today one of the most important centers for textile, chemical and oil industries today. He introduced a few social reforms. In no department of administration has the far-sighted policy of this wise ruler been more conspicuous than in education, and in none have the results been more real and tangible. He boldly introduced compulsory primary education and a library movement (the first of its kind in India) to augment his adult education scheme.

It was he who visualized a general scheme of development in all branches of knowledge at different stages, with the Maharaja Sayajirao University of Baroda at the apex. Modern Baroda owes its beauty, its educational institutions and its masterpieces of architecture to the insight and vision of this great ruler.

There is a saying that nothing grows under the banyan tree, but this is not true of Baroda. Having witnessed the rise and fall of the empires and kingdoms of the Hindus, Pathans, Mughals and Marathas, it now occupies a unique position on the educational, cultural and industrial map of India. Yet, it has been fortunate enough to retain the beauty of its rich and varied past. And it is one of the few cities in India which is still influenced by the lost might of its ruling dynasties.

### **Area & Administration:**

By and large the District consists of one Municipal corporation i.e. Vadodara Mahanagar Seva Sadan (VMSS), 8 Talukas (Under 5 Subdivisions) and 4 Nagar Seva Sadan (Municipalities) through which the administrative function has been operated. There is a separate department specific administrative structure existed and functioning accordingly.

The District Vadodara is situated in the southern east part of Gujarat State and it is the oldest planned city famous for educational institution. Vadodara district is in south Gujarat. The city is situated on the bank of Vishwamitri River. The district boundary of Vadodara extends from 21.49' N latitude to 22.49' N latitude and from 72.51' E longitude to 74.17° E longitude. It is bounded on north by Panchmahal & Dahod districts, on east by MP& Maharashtra, on south by Narmada district and on West by Anand and Kheda districts.

Mahi River flows on Northwestern boundary of the district and Narmada on the SE boundary of the district; are the major rivers. The other major rivers are Vishwamitry, Dhadhar and many other seasonal streams. The major water bodies are Ajwa Reservoir, Dev dam, etc.

It is one of the larger districts of Gujarat sprawling over an area of 4277.51 sq. km. It is home for a population of 30,93,795 spread over 677 villages and five urban areas. For administrative convenience the district is divided into 8 Talukas, one Municipal Corporation (Vadodara City Map is shown under) and four Municipalities.

### **Map : 1 : Vadodara District Map**

Map - 2: Vadodara City Map

Of the eight Talukas, 6 Talukas fall within the 75cm annual isohyets line, whereas two talukas on northwestern tip of dist. viz. Savli and Vadodara fall in 100 cm annual isohyets line. Having one

Municipal corporation (Vadodara Mahanagar Seva Sadan), Vadodara district has been fallen in the following administrative divisions:

**Total Nos. of Subdivision: -05**

**(Vadodara-City, Vadodara-Rural, Karjan, Savli, Dabhoi)**

**Total No. of Taluka : - 08**  
 Total No. of Village : - 677  
 Total No. Municipalities : - 04

Broadly District specific demographical details (As per 2011 Census Provisional Data) are as under:

**Table: 1**

| No | Name of Taluka | No. of villages | Population | Municipalities with Type | Population |
|----|----------------|-----------------|------------|--------------------------|------------|
| 1  | Vadodara (R)   | 82              | 2009434    | VMC                      | 1822532    |
| 2  | Karjan         | 93              | 167579     | Karjan - Type C          | 30405      |

| 10 |                   |                        |                        | Subhelav - Savli             |
| 11 |                   |                        |                        | Varsada - Savli              |
| 12 |                   |                        |                        | Sarsi - Desar - Savli        |
| 13 |                   |                        |                        | Vesaniya - Waghodia          |
| 14 |                   |                        |                        | Haripura- Savli              |

**Soil:**

The soil found in the District may broadly be classified as alluvial, black, light brown and alkaline. The major types of soil present in the district are alluvial soil, black cotton soil and mixed types. Alluvial soil is found in five talukas viz. Savli, Vadodara, Waghodhia, Padra, and Dabhoi in western

part of District. The Black soil is found on southwestern talukas of Karjan, Shinor and Dabhoi. In rest of the district, varieties of soils are being found.

**Crops:**

The major crops grown are cotton, paddy, jowar, groundnut, wheat and bajra. Fisheries and animal husbandry are major allied activities of agricultural communities in the district. Moreover, Vadodara is the major industrial hub of the country. The major industries found here are Oil and Petrochemicals, Textile, Chemical, Medicine, Glass, Engineering, Cotton, Tobacco, Fertilizer etc. The District is crisscrossed by major rail and road links joining Delhi- Ahmedabad-Mumbai corridor. Because of this it is known as the 'Gateway to the golden corridor'.

**Infrastructure details**

**Education:**

Baroda is synonymous with education. The patronage of education started with Maharaja Sayajirao and the city has built further on the academic infrastructure established by him. The present educational foundation rests on over more than 20 public schools and over 100 private schools at the district place. Towering benevolently over all is the Maharaja Sayajirao University, the jewel in the Baroda crown, so to speak: MSU. It has 13 faculties and 17 residential hostels, 4 of them for women students. The university caters to over 60,000 students.

M.S. University - Vadodara is the main university in district. There are different Colleges in different blocks Dabhoi, Sadhli, Karjan, Limda- Waghodia and Savli has colleges affiliated with Gujarat University.

#### **Other Educational Institutions:**

- Technology/Pharmacy/Medical - Vadodara, Limda-Waghodia.
- P. T. C. College 1. Vadodara. 2. Dabka-Padra 3. Waghodia
- S. N. D. T, College, Vadodara
- Medical College, M. S. Uni. Vadodara.
- Homeopathic College, Savli, Vadodara
- Dental College, Vadodara, Pipalia-Waghodia
- Ayurvedic College, Vadodara

#### **Schools:**

##### **Total Primary Schools -**

There are total 1066 primary schools in the district, in which total 261740 students are studying in 1<sup>st</sup> to 8<sup>th</sup> standard.

##### **Secondary School -**

Total 175 Secondary schools amongst which 82 are granted schools, 85 are non-granted schools and 8 are government schools. Total 85,238 students are studying in these 175 schools.

##### **Higher secondary school -**

Total 254 Higher secondary schools amongst which 159 are granted, 94 are non-granted and 01 are government school. Total 54,092 students are studying in these 254 schools.

**Fisheries:**

Fishermen are not much active in the Vadodara District as there is no sea in the district but as per the details from fisheries department the fishing activity is done at the place where ponds and rivers placed the fishing activity carried out by local fishermen. Total 6688 fishermen are there in the district amongst which all are active fishermen.

For these fishing activities these fishermen uses 30 different types of big flat boats, 7 small boats, approximately 116 Tarapas / Tin boats and around 5251 nets for fishing activity.

**Live Stock:**

Cattle wealth occupies pivotal place in the rural economy of the district, the Livestock position is as below:

**Table: 6**

| No.             | Types of Live Stock | No. of live Stock |
|-----------------|---------------------|-------------------|
| 1               | Bullock             | 69466             |
| 2               | Cows                | 43356             |
| 3               | Buffaloes           | 108164            |
| 4               | Sheep & Goats       | 6671 & 125386     |
| Total livestock |                     | 353043            |

There are 1 Veterinary hospital and 14 Dispensaries in the district.

**Industries:**

There are number of factories registered under the Indian factories Act. Approximately 786 small scale industries have been functioning in the District. Total 6 GIDC functioning in the Vadodara district.

There are several major factories like petrochemicals and Refinery or GSFC, Gujarat refinery, IOCL, IPCL, GACL, GIPCL functioning in the district. Other than these Deepak Nitrate, Apollo Tire, Philips India, JCT, Munjal Auto, Nirma, GAIL- India, Alembic are the few large scale companies whose working plants are situated in the Vadodara city or district.

Many Chemical Industries has been their own establishments in Nandesari Industrial area and some of the Chemical industries are situated in different GIDC's of the District.

Industries have their own Onsite Emergency Management Plans to deal with onsite emergencies and the other major units like IOCL, BPCL etc. has developed their Disaster Management Plans.

### **Roads & Railway:**

The district has 3191 Kms length of pakka roads connecting to 426 villages/towns in the district. 249 villages are connected by kachha roads and 43 villages accessible only in fair weather. Out of the total 694 inhabited villages, 633 villages are connected by state road transport facilities.

Total length of railway track is 557 kms in the District, out of that Broad Gauge length is 557 Kms and remaining is Meter gauge.

### **Health Facilities:**

The district has more than 30 private Hospitals, 42 PHCs and 8 CHCs in the District to cater the people. Major hospitals are SSG Hospital, Jamanabai Hospital, GMERS General Hospital Gotri, Baroda Heart Institute, Bhailal Amin Hospital, Bankers Heart Institute, etc. located in Vadodara city area which can be viewed in Annexures. Locations of the CHCs and PHCs in different talukas are as follows:

### **Table: 6: Details of CHC & PHC:**

| Sr. No. | Taluka           | Name of CHCs  | No. of PHCs                                                   |
|---------|------------------|---------------|---------------------------------------------------------------|
| 1       | Vadodara (Urban) | Chhani        | In City Area SSG, GMERS Gotri Hospital and Jamanabai Hospital |
| 2       | Vadodara (Rural) | Por           | 09                                                            |
| 3       | Karjan           | Karjan        | 05                                                            |
| 4       | Padara           | Padra         | 07                                                            |
| 5       | Savli            | Savli & Desar | 05                                                            |
| 6       | Vaghodiya        | Jarod         | 04                                                            |
| 7       | Dabhoi           | Dabhoi        | 05                                                            |
| 8       | Sinor            | Motafifalia   | 03                                                            |
| 9       | Desar            | Desar         | 04                                                            |

# **Interim Guidance & Risk and Vulnerability Ranking**

(Adapted from Technical Note No. 1.4.1. - Probability, Impact and Risk Ranking Disaster Management Planning Workshop module (pages 20-21), prepared by Jeff Klenk, Interworks, for the ADB-funded CBERR Project.)

All events or activities carry some risk and are associated with some level of vulnerability. Risk and vulnerability ranking is the process of assigning scores to the risk and possible impact of hazards to be able to compare the likely vulnerability and make informed management decisions about which hazards are of greatest concern and when planning and preparation efforts should be directed. A crude risk and vulnerability ranking process can be accomplished in five steps.

**Step 1: identify the Hazards of Concern:**

Complete the hazards column for the following table. Typical hazards have already been identified, but these should be confirmed at this step and additional hazards added as appropriate.

| <b>Hazard</b>                    | <b>Probability</b> | <b>Impact</b> | <b>Vulnerability Rating<br/>(Probability times Impact)</b> | <b>Specific Locations and populations of concern.</b> |
|----------------------------------|--------------------|---------------|------------------------------------------------------------|-------------------------------------------------------|
| Earthquake (resulting in damage) |                    |               |                                                            |                                                       |
| Wind (cyclone)                   |                    |               |                                                            |                                                       |
| Sea surge (cyclone)              |                    |               |                                                            |                                                       |
| Flood                            |                    |               |                                                            |                                                       |
| Industrial Accident              |                    |               |                                                            |                                                       |
| Drought                          |                    |               |                                                            |                                                       |
| Heat/cold wave                   |                    |               |                                                            |                                                       |
| Hailstorm                        |                    |               |                                                            |                                                       |
| Landslides/Mudflows              |                    |               |                                                            |                                                       |
| Dam Failure                      |                    |               |                                                            |                                                       |
| Mine fires/collapse              |                    |               |                                                            |                                                       |
| Road/rail/air accident           |                    |               |                                                            |                                                       |
| Oil spill (marine)               |                    |               |                                                            |                                                       |

|                                                                 |  |  |  |  |
|-----------------------------------------------------------------|--|--|--|--|
| Boat sinking                                                    |  |  |  |  |
| Building collapse                                               |  |  |  |  |
| Human Disease (epidemics)                                       |  |  |  |  |
| Food poisoning                                                  |  |  |  |  |
| Animal disease (epidemics)                                      |  |  |  |  |
| Terrorism (consequences)                                        |  |  |  |  |
| Critical Infrastructure Failure<br>(e.g. extended power outage) |  |  |  |  |
| Civil Unrest                                                    |  |  |  |  |

### **Step 2: Assign the Probability Ratings:**

Assess the probability-or "likelihood" of each hazard by reaching a consensus on probability and then assign each hazard a "Probability Level," as indicated in the following table. Enter the score for each hazard in the probability column of the table as below:

| <b>Probability</b> | <b>Score</b> | <b>Description</b>                                             |
|--------------------|--------------|----------------------------------------------------------------|
| Almost certain     | 5            | A regular event, on average at least once in a 12-month period |
| Likely             | 4            | Will occur at least once every two years.                      |
| Moderate           | 3            | Will occur at least once every 5 years.                        |
| Unlikely           | 2            | Will occur sometime in a 25-year period.                       |
| Rate               | 1            | It can be expected to occur sometime in a 100-year period      |

### **Step 3: Assign the Impact Ratings:**

Assess the potential magnitude or impact of each hazard and assign each an "Impact Level" as in the following table. Enter the impact score for each hazard in the table in Step 1.

| <b>Impact</b> | <b>Score</b> | <b>Description</b>                                                                                                                                                                     |
|---------------|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Catastrophic  | 5            | Massive insecurity, substantial loss of life likely. Large and generalized assistance urgently needed for large segments of the population. Additional management, administrative, and |

|               |   |                                                                                                                                                                                                                                                                                                                            |
|---------------|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               |   | technical expertise are urgently needed. Large volumes of materials inputs needed.                                                                                                                                                                                                                                         |
| Major         | 4 | Security threatened large segments of population; substantial impacts on vulnerable groups likely. Some loss of life likely. Life-saving programs likely needed to handle impact of emergency situation. Large volumes of material inputs and additional administrative staff and technical expertise likely to be needed. |
| Moderate      | 3 | Security is threatened for potential target groups, some interventions may be needed, particularly for groups who likely face increase in vulnerability. Organization can likely respond with existing country/regional management structures.                                                                             |
| Minor         | 2 | Momentary insecurity local groups able to respond adequately to those in need. Some technical assistance by the organization may be helpful to local respondents, although not urgently needed.                                                                                                                            |
| Insignificant | 1 | Little or no significant change in conditions, no expected loss of life, injuries or significant loss of property for usual target groups as the result of the hazard Normal operations continue.                                                                                                                          |

#### **Step 4: Assign the "Vulnerability" Ranking:**

Multiply the probability and the impact scores in the table in Step 1. The resulting score indicates crude vulnerability. Scores above 15 indicate high vulnerability; scores between 7 and 15 indicate medium vulnerability and scores below 7 indicate low vulnerability.

| <b>Probability<br/>Rating: Class and<br/>(score)</b> | <b>Impact Rating: Class and (score)</b> |                      |                         |                      |                             |
|------------------------------------------------------|-----------------------------------------|----------------------|-------------------------|----------------------|-----------------------------|
|                                                      | <b>Insignificant<br/>(1)</b>            | <b>Minor<br/>(2)</b> | <b>Moderate<br/>(3)</b> | <b>Major<br/>(4)</b> | <b>Catastrophic<br/>(5)</b> |
| Almost certain (5)                                   | Low-5                                   | Moderate - 10        | Moderate -15            | High-20              | High-25                     |
| Likely (4)                                           | Low-4                                   | Moderate- 8          | Moderate -12            | High-16              | High-20                     |

|              |       |       |                |                 |              |
|--------------|-------|-------|----------------|-----------------|--------------|
| Moderate (3) | Low-3 | Low-6 | Moderate<br>-9 | Moderate<br>-12 | Moderate -15 |
| Unlikely (2) | Low-2 | Low-4 | Low-6          | Moderate<br>-8  | Moderate -18 |
| Rare (1)     | Low-1 | Low-2 | Low-3          | Low-4           | Low-5        |

These three classes are related to the immediate vulnerability to disaster and provide guidance on disaster response planning. Assessing risk and vulnerability to low likelihood but high impact hazards (e.g., earthquakes) requires a different, more long-term focused, assessment process.

Note that the rating process presumes that:

- Populations are better able to respond to disasters which more likely and do not have severe (major) impacts and,
- Steps taken to prepare for moderate or high vulnerability events will also improve the ability to respond to low vulnerability events.

The divisions between low, moderate and high crude vulnerability can be changed but should be used consistently for all similar assessments in the state.

#### **Step 5: Identify Areas with Highest Vulnerability:**

Once vulnerability ranks have been identified, the locations and populations considered most vulnerable should be identified. This aids in knowing where disaster assistance may be most needed, as well as providing a quick indication of where vulnerability reduction efforts could be most productive. Note that vulnerability reduction can include education, structural measures, and non-structural measures like evacuation planning. Where possible, the areas of high vulnerability should be mapped and included in disaster planning documents.

## **DISASTER SPECIFIC ACTION PLAN**

## **1 Action Plan for Flood Hazard**

As per the risk and vulnerability analysis of the Vadodara district the district has major risk of floods. The District has two major rivers viz. the river Mahi that flows on Northwestern boundary of the district and the river Narmada on the Southeastern boundary of the district; there are other rivers like Vishwamitry, Dhadhar, Suriya and many other seasonal streams that flows through the district; more over to these, major *water bodies* like Ajwa Reservoir and Deo dam are also the possible sites from where the risk of floods is possible.

All the talukas of the district with major wards of the city are the possible sites which are either affected during the heavy rainfall or water logging or by water release from the dams or reservoirs.

### **Early Warning & Communication:**

## **GENERAL TERMINOLOGY USED IN WEATHER BULLETINS**

### **(A) Intensity of Rainfall Terminology Used**

1. 0.1.mm to 2.4 mm (24 hrs) ----- Very light rain
2. 2.5 mm to 7.5 mm ----- Light rain.
3. 7.6 mm to 34.9 mm ----- Light to Moderate rain
4. 35.0 mm to 64.9 mm ----- Moderate rain
5. 65.0 mm to 124.9mm ----- Heavy rain
6. Exceeding 125 mm. ----- Very Heavy rain.

### **(A) Special distribution of weather phenomenon**

#### **Percentage Area Covered Terminology Used**

1. 1 to 25 ----- Isolated
2. 26 to 50----- Few Places
3. 51 to 75 -----Many Places
4. 76 to 100 -----At most Places

### **(C) Emergency Situation**

1. When water level is rising above the danger of H.F.L
2. When intensity of rainfall is above 65 mm/hr
3. When breaches are anticipated and which may cause disaster
4. When water levels are rising abruptly and which may cause disaster

#### **(D) Evacuation**

- (1) White Signal- Alert condition
- (2) Blue Signal - Ready for Evacuation
- (3) Red Signal - Immediate Evacuation

As and when the warning come from Indian Metrological department (IMD), or from Irrigation department regarding heavy rainfall or water release the following channel has been intimated and appropriate message conveyed to the concerned department / official / control rooms / community members using telecommunication, wireless message, by fax or in written by DEOC.

In city area the route has been finalized for early warning, accordingly early warning task force leading by fire brigade personnel, spreads the message of alert in respective low line areas, in villages local methodologies of early warning has been used (by beating up of drums etc.) to communicate the message of alert to the affected population of the village.

The following channel has been intimated and appropriate message conveyed to the concerned.

**Early Warning & Communication Chart:**

**Response:**

The response mechanism would be the same as describes with the general response mechanism chapter, here the focus will be on Irrigation department, administrative officials and the affected areas/population.

When early warning has been circulated the same department heads, focal officials and administrative heads will put their own DM plan into the action and the response activities will be carried out accordingly.

- As disaster declares the response managed and monitored through DEOC.
- All the concerned DDMC members along with the Liaison officers and response group members are intimated to respond to the situation as described in the chart below.
- As per the impact of disaster, it will be managed through DEOC / TEOC and if needed support of State or Central departments will be requested to deal with the situation.
- DM Plan of Irrigation Department, Flood memorandum, TDMP, CDMP and other DM Plan will be referred as an when it is required to respond in case of floods.
- The list of trained swimmers is incorporated with Annexures.
- Equipment for flood rescue like boats Life rings, Life buoys, dewatering pumps etc. details are incorporated in Annexures.
- Database of SDRN and IDRN (Manually and Electronic) will be referred for flood response.

### **Response Chart:**

**Post Emergency:** Focus will lie on Medical Treatment, Disease Control, Poison control, Reconstruction & Rehabilitation, Floodwater Removal, and Providing Relief—Clothing, Shelter, etc. to affected people, Damage Assessment, Funeral processes.

**Temporary Shelter:**

- ❖ For temporary shifting of affected people, temporary shelters are used during the effect of floods.
- ❖ In city area, Vadodara Municipal Corporation has decided ward wise primary schools, Secondary/Higher secondary schools, Community Hall, Colleges etc. as temporary shelter for flood affected persons and incorporated the same with their DM Plan which is used at the time of floods. Sasnadhikari is the focal person for temporary shelter for corporation area.
- ❖ Primary/Secondary/Higher secondary schools, Colleges, Community Hall etc. of taluka and villages are used as temporary shelter and the focal officer for the same is DEO and DPEO.

**(A) List of villages likely to be affected by floods in Narmada River on the basis of Gauge of Garudeshwar & Bharuch sites**

| KARJAN TALUKA | DABHOI TALUKA | SINOR TALUKA   |
|---------------|---------------|----------------|
| Pura          | Chandod       | Madhidevashram |
| Alampura      | Karnali       | Barkal         |
| Lilayipura    | Nanderia      | Diver          |
| Nani Koral    |               | Malsar         |
| Moti Koral    |               | Anusya temple  |
| Juna Sayar    |               |                |

**(B) List of Villages likely to be affected by floods in Mahi River on the basis of gauge of Wanakbori Weir**

| PADRA TALUKA | SAVLI TALUKA | TALUKA    | VADODARA TALUKA |
|--------------|--------------|-----------|-----------------|
| Tithor       | Khandi       | Amarapura | Sindhrot        |

|             |                       |                   |           |
|-------------|-----------------------|-------------------|-----------|
| Pavda       | Chavda na Muvada      | Varsada           | Fajalpur  |
| Sultanpur   | Bamna Muvada          | Mewalipura        | Dodka     |
| Mohammadpur | Jambugoral            | <u>Nanimamoli</u> | Rayka     |
| Kharera     | Gulabpura             | <u>Savli</u>      | Angadh    |
| Dabka       | Vankaner              | <u>Shibora</u>    | Sherkhi   |
| Chaorani    | Jalampur              | <u>Muval</u>      | Nandesari |
| Jaspur      | Vagpura               | <u>Vaghra</u>     | Amliara   |
| Umraya      | Kanoda                | <u>Desaipura</u>  | Adalpura  |
| Mujrpura    | poicha<br>prathampura | Levaipura         |           |
| Konta       | Paicha rania          | Bandipura         |           |
| Ekalbara    | Intwad                | Jesangpura        |           |
|             | Wanoti nani           | Bandipurnamuvada  |           |

The below described area / rivers / dams / talukas / Villages and population are the most concerned factors in the flood response.

**Vulnerable elements (Villages and Population) due to heavy rain and flood**  
**(As per Census - 2011)**

| No. | Taluka | River         | Village    | Total Population | SC  | ST  |
|-----|--------|---------------|------------|------------------|-----|-----|
| 1   | Karjan | Narmada River | Pura       | 1149             | 34  | 526 |
|     |        |               | Alampur    | 138              | 6   | 374 |
|     |        |               | Lilayipur  |                  |     |     |
|     |        |               | Nani-Koral | 723              | 39  | 306 |
|     |        |               | Moti-Koral | 2809             | 183 | 19  |
|     |        |               | Juna Sayar | 2364             | 116 | 264 |
|     |        |               | Sagdol     | 1022             | 79  | 491 |
|     |        |               | Oz         | 1616             | 85  | 64  |
|     |        |               | Somaj      | 230              | 32  | 55  |
|     |        |               | Delwada    | 504              | 49  | 92  |

## **.2 Action Plan for Industrial / Chemical Disaster**

To deal with Industrial / Chemical disasters, separate Off site Emergency Plan -DM plans developed by Director Safety & Health - Vadodara, total coverage of Task force, Rescue Teams, contact details, shelters, response mechanism etc. with MAH unit details and Annexes has been incorporated with the Plan and the same can be referred at the time of Offsite emergency.

Off-site Control Room (OCR) is functioning to take care of Industrial accidents particularly of MAH units of **PCC (Petro Chemical Complex) and Nandesari GIDC Area,Padra Industrial Pocket, Savli Industrial Pocket, Waghodia Industrial Pocket Karjan Industrial Pocket Out of total 81 MAH units in the district 61 are active ones and 20 units are closed.** OCR is located at Material Bhavan, Reliance Industries Ltd., Petrochemicals, and Vadodara. One of its wireless sets is based at DEOC, and both DEOC and OCR closely work together at the time of Emergencies.

Industries have their own Onsite Emergency Management Plans to deal with onsite emergencies and the other major units like IOCL, BPCL etc. has developed their Disaster Management Plans.

Maintenance of permanently established machinery and shutdown mechanism can be monitored periodically with high concern, could be a major concern of risk in case of large-scale industries / petro chemical industries.

Under the chairmanship of DM & Collector the response will be managed and monitored from DEOC and Off-site control room, department wise response mechanism and response structure lied with Offsite emergency plan and will be referred the same at the time of chemical disasters which includes industrial fire, oil spill etc..

With respect to the history and probability of the risk the vulnerable elements with regards to industrial accidents for Vadodara district are the villages or area as a whole, environment, water bodies etc. from which the vulnerable villages and probably affected population details are

incorporated with the details below. Separate details of the Shelter, contact persons to approach at the time of emergencies has also been incorporated.

The response mechanism would be the same as describes with the general response mechanism chapter, here the focus will be on Industries, Offsite control room, District Crisis Group officials, technical members, Member secretary - OCR, GPCB and Office of Joint Director, DISH with different Industries DM Plan and experts of different chemical hazards.

When there is a chemical kind of emergency off site emergency plan with the DM plan of the concern industries comes into the action and the response activities will be carried out accordingly.

- As Chemical disaster declares, the response will be managed and monitored through DEOC / OCR
- All concerned DCG members with Liaison officers and response group members are intimated to respond to the situation as described in the below chart.
- As per the impact of disaster it will manage through DEOC / OCR / TEOC and if needed the support of State or Central departments will be requested to deal with the situation.
- Offsite Emergency Plan, TDMP, CDMP and other Industries DM Plan will be referred as and when required to respond in case of chemical disaster.
- The list of Expert persons, indicative list of medicines and equipments, trained first responders for Search; Rescue & Medicare etc. are available with offsite emergency plan.

Database of SDRN and IDRN (Manually and Electronic) will be referred if needed in response.

**Action Chart in case of Chemical / Industrial Fire / Oil Spill types of Emergencies is as under:**

|      |        |                     |
|------|--------|---------------------|
| Fire | Police | Health &<br>Medical |
|------|--------|---------------------|

|                                |
|--------------------------------|
| Civil Defense &<br>Home Guards |
|--------------------------------|

**Vulnerable elements (Villages and Population) due to Industrial hazards:**

| Sr.No. | Name of Village | Total Population | SC   | ST  |
|--------|-----------------|------------------|------|-----|

**Ref. of Population: Census 2011**

### **.3 Action Plan for Earth quake**

Vadodara falls under zone-III according to the zoning map, that's why it can be possible that an earthquake between magnitudes of 4-5 can strike Vadodara. But as there is fault line going through the District, earthquake of magnitude up to 7 can also strike. And very high possibility of failure of various infrastructures and very high chances of risk of loss of live properties too in certain highly populated areas of the district.

The response mechanism would be the same as describes with the general response mechanism chapter, here the focus will be on well-populated areas in particular city areas and the District disaster response group.

- ❖ As disaster declares the response managed and monitored through DEOC.

- ❖ All concerned DDMC members with Liaison officers and response group members are intimated to respond the situation as described in the below chart.
- ❖ As per the impact of disaster it will manage through DEOC / TEOC and if needed support of State or Central departments will be requested to deal with the situation.
- ❖ Departmental DM Plan of all concerned departments, TDMP, CDMP and other DM Plan will be referred as an when it is required to respond in case of Earth quake.
- ❖ Database of SDRN and IDRN (Manually and Electronic) will be referred for flood response.

| ZONES      | MAGNITUDE                               |
|------------|-----------------------------------------|
| Zone - V   | Greater than 7                          |
| Zone - IV  | Greater than 5, Less than or equal to 7 |
| Zone - III | Greater than 4, Less than or equal to 5 |
| Zone - II  | Greater than 3, Less than or equal to 4 |
| Zone - I   | Less than 3                             |

### Response Chart:

### **Temporary Shelter:**

- ❖ For temporary shifting of affected persons, temporary shelter is used during the effect of earth quake.
- ❖ In city area, in case of devastating earth quake the temporary shelters available with DEOC (Tarpaulin sheet with iron blades) can be used, tents with forest and other department and caterers can also be used as temporary shelter
- ❖ None damaged / safe government establishments can also be used as per the directions of chairperson.

### **4 Action Plan for Cyclone**

Vadodara District has no ocean but the district is nearby the Bay of Cambay and it is surrounded with two major rivers the river Mahi flows on Northwestern boundary of the district and river Narmada on the Southeastern boundary of the district; there are other rivers like Vishwamitry, Dhadhar and many other seasonal streams flows through the district, the villages and areas near these rivers can be affected at the time of cyclone.

All the talukas of the district with major wards of the city are the possible site which can be affected during the heavy wind flow. Majorly the flood action plan will be referred at the time of cyclone.

### **Response Chart:**

### Temporary Shelter:

- ❖ For temporary shifting of affected persons, temporary shelter is used during the effect of Cyclone.
- ❖ In city area, Vadodara Municipal Corporation has decided ward wise primary schools, Secondary/Higher secondary schools, Community Hall, Colleges etc. as temporary shelter for Cyclone affected persons and incorporated the same with their DM Plan which is used at the time of Cyclone. Sasnadhikari is the focal person for temporary shelter for corporation area.
- ❖ Primary/Secondary/Higher secondary schools, Colleges, Community Hall etc. of taluka and villages are used as temporary shelter and the focal officer for the same is DEO and DPEO.

### 5 Action Plan for Biological Disaster

Majorly the people of urban area residing in Vadodara district is affected by various types of Vector born decease and Water born decease during the monsoon season. Frequent epidemics, especially during monsoon are a common aspect for Vadodara district.

Vadodara district is endemic to various water-borne diseases such as Cholera, Leptospirosis and Malaria. Several relatively minor ailments such as Diarrhoea are more common during the monsoon. Most importantly, there is always a danger of epidemics breaking out after floods arising due to different factors – inundation of wells under contaminated sewage water, wading through such flooded water. There is contamination of groundwater as well as well-water in such circumstances. Well water can be contaminated directly when sewage water enters the well during inundation.

Variety of groundwater pollution problems have emerged in the past two decades in Vadodara district. Fluoride, Nitrate and pollution from industrial effluents have caused contamination of aquifers in different parts of the district. Fluoride is present in several minerals such as Apatite and Hornblende are found in rocks of Igneous origin which leads high amounts of fluoride content in groundwater, increasing use of Nitrate-based fertilizers that are not fully consumed by plants result in leaching of excess Nitrates into aquifers. Further, human and animal faeces also contribute to rise of Nitrate content in groundwater.

### **Response:**

Health department in particular Health department - District Panchayat, who will look after and respond such kind of disaster arising in Panchayat areas, such as taluka level and village level, for urban pocket health division of Vadodara Municipal Corporation (VMC) will respond in such kind of disaster. Health department - District Panchayat and VMC has their own set of epidemics team and task force to respond in such kind of disaster, for sampling of the water, grains, food sample etc done by Laboratory of Food & Drug, Near M.S.University, Vishwamitri Bridge, Vadodara.

### **Response Chart:**

**Control Room**

**Health department  
VMC**

**District Emergency operation Centre**

## **6 Action Plan for Oil Spills and Mine Disasters**

State level action plan / department specific action plan / Industries specific action plan will be referred at the time of the above stated Disasters. The response mechanism would be the same as describes with the general response mechanism chapter.

- As disaster declares the response managed and monitored through DEOC.
- All concerned DDMC members with Liaison officers and response group members are intimated to respond the situation.
- As per the impact of disaster, it will manage through DEOC / TEOC and if needed support of State or Central departments will be requested to deal with the situation.
- Database of SDRN and IDRN (Manually and Electronic) will be referred for response.

### **7 Action Plan for Tsunami :**

The possibility of the above stated disaster is very less with respect to Vadodara District, but if the effect of it is felt by the nearby district / state, will accordingly respond as per the State directions.

### **8 Action Plan for Heat Wave:**

Since two years due to global warming effect, Heat Waves have become hazard for the human life. Though it cannot be called Disaster because according to Disaster's definition it does not fit into the condition of harming infrastructure and precautionary measures and timely response are required to cope up with it. India Meteorological department has started issuing different alerts for high temperature which are as follows:

- Yellow Alert : 41.1 to 43.0 Degree Celsius
- Orange Alert : 43.1 to 44.9 Degree Celsius
- Red Alert : Greater or Equal to 45 Degree Celsius

Thus, according to these alerts Vadodara has already been issued orange alert in the year 2016. And keeping in mind the impact of heat wave on human life following roles and responsibilities has been given to various departments in order to reduce the impact of heat wave:

The above table represents the responsibilities of different Departments for various provisions that will help public reduce the impact on their health. In addition to that, DO's and DONT's for reducing the impact of Heat Wave, has been issued by Gujarat State Disaster Management Authority, Govt. of Gujarat which are as follows:

# ગરમીમાં લૂ લાગવા (હીટ વેવ) થી બચો

## આરોગ્યલક્ષી સુચનો

- \* હીટ વેવ દરમિયાન સુધી બહાર નીકળવાનું ટાળવું, આખું શરીર અને માથું ઢંકાઈ તે રીતે સફેદ સુતરાઉ ખુલતા કપડાં પહેરવા, ટોપી, ચશ્માં, છત્રીનો ઉપયોગ કરવો.
- \* નાના બાળકો, સગર્ભા માતાઓ, વૃદ્ધો તથા અશક્ત અને બિમાર વ્યક્તિઓએ તડકામાં વિશેષ કાળજી લેવી
- \* સીધા સૂર્ય પ્રકાશથી બચો
- \* ભીનાં કપડાંથી માથું ઢાંકી રાખો અવાર-નવાર ભીનાં કપડાંથી શરીર લૂછો વારંવાર ઠંડું પાણી પીવું
- \* લીંબુ શરબત, મોળી છાશ, તાડફળી અને નારીયેળનું પાણી, ખાંડમીઠાનું દ્રાવણ, ઓ.આર.એસ. વગેરે પુષ્કળ પ્રમાણમાં પીવા
- \* બાળકો માટે કેસુડાનાં ફુલ તથા લીમડાના પાનનો નાહવાના પાણીમાં ઉપયોગ કરવો
- \* ગરમીમાં બહારથી ઘરે આવ્યા બાદ શરીરનું તાપમાન નીચું આવે ત્યારબાદ જ નહાવું, શક્ય હોય તો ઘરના બારી અને બારણા સાથે ખસતી ટટ્ટી પાણી છાંટી બાંધી રાખવી
- \* દિવસ દરમિયાન ઝાડ નીચે, ઠંડક અને છાંયામાં રહેવું
- \* બજારમાં મળતો ખુલ્લો, વાસી ખોરાક ખાવો નહીં, બજારમાં મળતા બરફનો ઉપયોગ ટાળવો, લગ્ન પ્રસંગે દૂધ, માવાની આઈટમ ખાવી નહીં
- \* ઉપવાસ કરવાનું ટાળવું, સવારનું ભોજન ૧૨:૦૦ વાગ્યા સુધીમાં લઈ લેવું
- \* ચા-કોફી અને દારૂના સેવનથી લૂ લાગવાની શક્યતા વધે છે, તેથી તેનું સેવન ટાળવું
- \* હીટ વેવની ચેતવણીના દિવસોમાં બપોરે બે વગ્યાથી ચાર વગ્યા સુધી બહાર નીકળવાનું ટાળવું

## લૂ લાગવા (હીટ વેવ) ના લક્ષણો

- \* માથું દુઃખવું, પગની પીડીઓમાં દુઃખાવો થવો
- \* શરીરનું તાપમાન વધી જવું
- \* ખૂબ તરસ લાગવી
- \* શરીરમાંથી પાણી ઓછું થઈ જવું
- \* ઉલ્ટી થવી, ઉબકા આવવા, ચક્રર આવવા, આંખે અંધારા આવવા
- \* બેભાન થઈ જવું
- \* સુધ-બુધ ગુમાવી દેવી (Confusion)
- \* અતિગંભીર કિસ્સામાં ખેંચ આવવી

- \* વરીયાળી, કાચી કેરી, ગુલાબ, ખસ(વાળા), અને કાળી દ્રાક્ષનું શરબત લઈ શકાય, રાત્રે ૧૦ નંગ કાળી દ્રાક્ષ પાણીમાં પલાળી સવારે આ પાણી પીવું અને દ્રાક્ષ ખાવી, તરબુચનો ઉપયોગ સવારે અને બપોરે કરવો.

લૂ લાગવાની અસર જણાય તો તાત્કાલીક નજીકના પ્રાથમિક આરોગ્ય કેન્દ્ર કે સરકારી દવાખાનાનો સંપર્ક કરવો.

ગુજરાત સરકાર દ્વારા જનહિતાર્થે

## 9 Action Plan for Lightning and Thunderstorm :

Thunderstorm and lightning have emerged as major weather hazards in recent years and have affected different parts of the country. Lightning and Thunderstorms are extremely short term phenomenon. The lightning strikes are instantaneous and it hits within flash of seconds. Thus, it gives very little time to an individual react. These severe weather events cause extensive structural damages, destruction of crops, uprooting of trees and casualties.

## 10 Action Plan for Fire Incidents :

Fires can start due to human activities or from natural causes. Forest fires can start from either natural causes or human activity or from a combination of both. The most common fires are the residential and non- residential structural fires caused usually by human activities. Most industrial and chemical fires are triggered by human activity. They are sometime caused by human errors, faulty designs, or mechanical failures. Fire can also be the secondary effect of a disaster like earthquake. Secondary fires after a disaster like earthquakes constitute a substantial and heavy risk. Damage to natural gas systems during an earthquake can lead to major fires and explosions. Damages to electrical systems during a disaster can ignite major fires.

**Types of Fire Fires are classified in the following categories:**

- **Class A Fires:** Involving combustible materials of organic nature, such as wood, paper, rubber and many plastics etc. where the cooling effect of water is essential for extinction of fires.
- **Class B Fires:** Involving flammable liquids, petroleum products or the like, where a blanketing effect is essential
- **Class C Fires:** Involving flammable gases under pressure including liquefied gases, where it is necessary to inhibit the burning gas at fast rate with an inert gas, powder or vapourising liquid for extinguishers
- **Class D Fires:** Involving combustible metals, such as magnesium, aluminium, zinc, sodium, potassium, etc. when the burning metals are reactive to water and water containing agents and in certain cases to carbon dioxide, halogenated hydrocarbons and ordinary dry powders.

**Prevention from Fire**

Fire extinguishers are the most common type of firefighting equipment being installed at office facilities, warehouses and sales offices. They should be selected based on the type of fire hazard, as depicted below:

- Class A fires – Water, foam, ABC dry powder and halocarbons
- Class B fires – Foam, dry powder, clean agent and carbon dioxide
- Class C fires – Dry powder, clean agent and carbon dioxide extinguishers
- Class D fires – Extinguishers with special dry powder for metal fires

The Gujarat State Disaster Management Act, 2003 provides for the State Government to declare any area where any disaster has occurred as disaster affected area on the recommendations of the State Relief Commissioner or the District Collector. The purpose of declaration of disaster is to organize effective response and mitigating the earthquake effects. Such a declaration provides wide powers and responsibilities to the State Relief Commissioner and the District Collectors in order to handle the incident effectively.
