Annexure 1 – Modifications/Removals in Section VI - Employer’s Requirements

A. Clause 8: Functional Performance Requirements of the System – Point h – Location Based Alert System – Removed.

B. Clause 9.4.2: Location Based Alert System – (only following content is modified in this clause)

<p>Location Based Alert System (LBAS) allows for sending text messages (SMS) to all mobile subscribers and covers both national subscribers and international roamers whosoever present in the vulnerable area to be affected by Cyclone or any other Disaster.</p> <p>In LBAS, the operator is able to draw a polygon of a particular area through GIS map and send alerts to all people who are present at the time inside the polygon. Location based method sends alert to people based on their real-time location at the time of sending the alert.</p> <p>Please be noted that, LBAS is NOT a bulk-messaging utility.</p> <p>As said earlier, SMS technology can be used to send alerts in this method. Typically, choice of channel in this context can be determined by time to impact of the event. This can help in saving lives in the event of a natural or man-made disasters / emergency. The system has been designed to ensure effective communication before, during and after an emergency.</p> <p>The system should provide delivery reports. Also, this system should be able to maintain the privacy of unlisted receivers.</p>	<p>Removed</p>
